THE ANTHONY STEEL PLATE FURNACE

THE RECTORY, ALMONTE, 1st May, 1889.
J. M. WILLIAMS & CO., Hamilton, Ont.
GENTLEMEN,—I have great pleasure in testifying to the excellent qualities of the Anthony Steel Plate Furnace. The air is chilly and damp to-day, so the furnace is still in action, keeping the house everywhere at a temperature of 65° to 70°. It did the same when the thermometer outside indicated 20° below zero. I attribute our good health and exceptional freedom from coughs and colds the past winter to the steady, even heat maintained by the Anthony Steel Plate Furnace.
