

where:

- A = the support provided by the federal and provincial governments to producers of barley through the NISA for that calendar year
- B = the support provided by the federal and provincial governments through the NISA for that calendar year
- C = cash receipts of barley for that calendar year
- D = total cash receipts of all eligible commodities under the NISA for that calendar year.

I also have the honour to propose, pursuant to paragraphs 5 and 6 of the Annex, that our Governments agree to include under Schedule 2 "Canadian Government Support Programs", Part B "Other Support", of the Annex the following programs and agreed-to-methodology:

10.1 Payments Pursuant to the Cash Flow Enhancement Program (CFEP)

The support provided by the federal government to producers of barley through the CFEP is the total amount paid to producers of barley for that crop year. The support is computed in accordance with the following formula:

$$A = \left(B_1 * \frac{C_1}{D_1} \right) + \left(B_{11} * \frac{C_{11}}{D_{11}} \right)$$

where:

- A = the support provided by the federal government to producers of barley through the CFEP for that crop year
- B₁ = the interest cost of the funds advanced to producers of all eligible crops under the Prairie Grain Advance Payments Act for that crop year
