### **NEW ASSESSMENT ACT** WILL BRING TROUBLE

Citizens Claim That While Some Properties Are Reduced Others Go Up.

ST. THOMAS, July 17.—A serious battle is brewing here as a result of the work of assessment commissioner J. P. Freek, who, under the new assessment commissioner J. ment act, is making his 1920 valuation at the present time. It is the results of his assessment that is causing the trouble, and there is little doubt at the present time but that when the court of appeal holds its session in September there will be a miniature

war.

Under the new act, it requires a certain valuation on the property to charge the owner taxes on fifty per cent of his assessed value. One rate-payer stated to The Advertiser tonight that while some properties are being reduced others are being rated much higher than ever before. He cited his own case as an instance. He resides in a fairly valuable residential section the marine strike controversy were holding aloof tonight, with no overtures reported from the strikers, the shipping board or the American Steamship Association.

Gus. H. Brown, secretary of the Marine Firemen's Union, said tonight that 50 ocean-going ships of the Brooks Steamship Company would be manned by union crews immediately as a result of a settlement with that in a fairly valuable residential section company. of the city, and the assessed value of his property has been raised \$1,000. Despite this, he says there have been no improvements on the property, and there is apparently no reason for the advance.

Other cases are cited where the assessed value of the property has de-

creased. It is quite probable that the matter will be taken up with the city council before September.
