British and European—Frederick A. Smyth, 20 Lodge Hill, LONDON, E. C., England. The Audit Bureau of Circulations audits the circulation of The Evening Times.

## NEWS OF VICTORY.

"French troops have entered Soissons." This brief sentence flashed over the cable last night brought the most heartening news of the week. It meant that one of the German anchor points of the Marne salient had given way before the tremendous pressure of the Allies, and that the enemy must now retreat more hastily. Later came news that the Germans had been pushed back along the whole line and were in precipitate retreat from the Tardoms line toward the Vesle River, if not the Aisne. French, Americans and British are close on the heels of the retreating enemy. He may make a stand at the Vesle or go back to the Aisne. He has lost or is losing practically all that he gained since last May. Last night's news was the more cheering because it was unexpected. Although yesterday's reports told of important gains in the centre of the Marne salient there was no hint that the French were likely to capture Soissons. There and at Rheims the German resistance had been very stubborn.

The confidence of the Allies in Gen. Foch has not been misplaced. Patiently, but knowing it to be the right course to pursue, he has bided his time until his reserves had reached a point where he could afford to strike back and follow up the advantage. If he has surprised his friends what must be the feeling at German headquarters when they see their armies in retreat instead of advancing toward Paris? The genius of Foch has been their undoing. He struck at the decisive moment and took ample vengeance for the long and weary wait. Tomorrow, the fourth anniversary of Britain's entry into the war will be observed. The news from France will make it a more hopeful day. Not that the Allies can afford to lessen in the slightest degree their war effort, for there is still a long and hard road to victory to be traversed; but they will take up the task with a new heart and a firmer assurance of the final triumph of democracy. One of the great causes of thankfulness tomorrow will be the glorious page written in the history of the war in the past year by the United States, and the Canadian people will look upon the Stars and Stripes with a stronger feeling of reverence than would have been deemed possible a year ago. We are almost as proud of the splendid record of the American soldiers as if they were our own, and we admire more and more the whole-hearted way in which the American people are devoting themselves to the task of feeding the Allies as well as pouring soldiers into France.

**THE STUDY OF COMMERCE.** Bradstreet's is much interested in a recent speech by Mr. Balfour on commerce as a university study. The commercial journal regards it as a striking fact that a man who received the traditional education of a future English statesman, and one who "not only reached the highest posts in the public service of his country, but also earned distinction as a writer on philosophic subjects unconnected with politics should lend his powerful advocacy to a proposal to institute a special study of commerce, leading to degrees therein, in London University." We quote further: "At a recent meeting in the British capital he combated the contention that the project would lower the tone of university study and have a narrowing effect upon the minds of the students, declaring, on the contrary, that the courses of study proposed would widen the view of those engaged in commerce. Some persons, he said, seemed to think that the infinite activities of the commercial and industrial world were beneath the notice of highly educated and intelligent men, but he declared that there could be no more profound mistake, there being, indeed, few subjects presenting so many aspects of interest. In his view, the making, transport and marketing of goods and the financing of their distribution formed a subject so profoundly complicated that a man not needing to earn a living, and having no idea of gain, might well devote himself to a scientific viewpoint to this great study. Commerce, he argued, taught the science of social organization, diplomacy and international relations in every aspect, and he asked how such a study could have a narrowing effect. These words from a public man of broad sympathies though of the 'Brahmin Caste' are of a kind to attract wide attention, not only in his own country, but in other lands where the education of the future is under consideration."

## THE STANDARDS' IDOLS.

The Standard gleefully publishes this from the Woodstock Press: "To be a whale of a fellow with the (Liberal) party as a whole all that was necessary was to invent some crime against the wicked Tories of Carleton. The log stealing charges, the patriotic potato charges, the Indian Reserve charges, the Valley Railway charges, etc., followed in rapid succession. The thicker the charges came, the larger grew the majesties of Hon. Mr. Fleming and Hon. Mr. Smith. After having been defeated in 1904 by 274 votes, the Conservatives took complete charge of the county which they held at present. On Sept. 21, 1916, Mr. Smith had a majority over Mr. McCain of 592 votes, and on Feb. 24, 1917, Mr. Smith had a majority of 745 over Mr. Upham. From a political standpoint, scandal, abuse and ridicule do not deliver the goods in this county."

Well, where is Mr. Fleming now? What is his political reputation? Does the Standard still support him? Is he its ideal statesman? As for Mr. Smith—his case is still being attended to and of that more hereafter.

Ottawa Journal-Press: Only those who grow their own fruit or who can conveniently gather wild fruit or who are rich enough to disregard cost can give much heed to the advice of the Food Board to preserve fruit extensively now so that it may take the place of butter next winter. Prices are too high. Strawberries remained expensive throughout the season. Raspberries are now in and very high. Can the war be blamed for such extraordinary prices for fruit? It doesn't cost much more to grow raspberries now than it did a few years ago when they sold at around ten cents a box and the cost of picking can be responsible for only a very small part of the difference in price. It would be interesting to know what percentage of profit growers make on berries sold on the market.

Here is a fine illustration of what the Germans regard as success in war. A German war correspondent wrote to his paper: "From the strategic point of view the seven days' battle has been a complete failure. Nevertheless, success has been gained which I can register today. A new part of France has been laid waste. Everywhere are ruined towns, villages and farms. Fires light up the nights, and all day thick clouds of smoke, caused by violent explosions, float over the ravaged corn fields and destroyed forests." This is the kind of success the Germans glory in, but for which they will pay to the last cent.

The Foster government is proceeding steadily with its policy to conserve our forest wealth and make the crown timber lands a more profitable source of revenue. In this the government will have the co-operation of the lumbermen, for they also have a large interest in saving the forests from destruction.

The Valley Railway will cost about \$7,000,000. A lot of this was wasted. The people know where at least one-quarter of a million went, and the government wants it back.

By their conduct last night a mob of returned soldiers in Toronto put themselves in a class that disgraces any city. They of all men should be upholders of law and order.

The British destroyed seventy German airplanes last week and sent eleven down out of control. That is a fine record.

The great offensive of the German Crown Prince has completely collapsed. Willie is running away.

The Germans are burning towns and villages as they retreat from the Marne salient. The Hun is always a Hun.

Gen. Mangin is another commander who is making a brilliant record in the war.

The Kaiser's men who went "forward with God" are now going backward "as if the devil was after them."

Gen. Friedrich A. J. von Bernhardi, the German Anglophobe war author, has received a lesson from the British at Nieppe.

## LIGHTER VEIN

Classified.  
"Oh!" cried the summer boarder, as a couple of calves trotted across the field, "what pretty little cowlets."  
"You're mistaken that, mum," replied the farmer, "them's bullets."

**Necessary Expenditure.**  
"I say, Brown, can't you manage to pay me that \$10 you owe me? I need the money."  
"Awfully sorry, old man, but I can't do it."  
"I notice you manage to go to the theatre two or three times a week, though?"  
"That's just it. The thought that I owe you money is worrying me so that I have to do something to help me forget it."

**Proof.**  
Customer—Look here! Isn't that a hair on the butter?  
Waiter—Yes, sir, a cow's hair. We always serve one with the butter to show that it isn't margarine.

Applications will be filed in the order received.

## WHAT CANADA HAS DONE IN FOUR YEARS

Ottawa, Aug. 2—Canada's achievement in the four years of the war are reviewed in a statement given, tonight by the director of public information.

Canada entered the war with a regular army of 8,000 men. At the beginning of last month she had sent overseas 890,000 while there were being trained 60,000 in the country. 45,000 have been killed; 118,000 have appeared in casualty lists as wounded or sick, 2,224 are prisoners of war and 384 are set down as missing. Of the wounded, between 80,000 and 40,000 have been returned to duty and 50,000 have been sent back to Canada certified unfit for further service, 10,000 soldiers have received distinctions of one kind or another, of whom there are thirty with the Victoria Cross.

As to the supply of munitions, Canada has supplied fifty-five per cent. of the output for the British army in the last six months of 1917, in respect of shrapnel. Total production of shells to recent date 60,000,000 pounds, total production of explosives, 100,000,000 pounds; total production of airplanes, 2,500; the total value of orders placed in Canada by the British government, \$1,200,000,000. Employed in this work were 350,000 men and women at one time.

In shipbuilding, contracts have been placed in the Dominion for 112 vessels with a total tonnage of 450,000. Most of these will be launched in 1918.

In food supply Canada has increased the beef export by nearly 75,000,000 pounds per annum, and pork by 125,000,000 per annum.

In finance, Canada's total outlay for war purposes was about \$875,000,000 by March 31 last. National debt stood at \$338,000,000. At the end of this year \$1,200,000,000. Borrowed from Canadians has been the sum of \$750,000,000. Grand total of gifts amounts to \$11 per head of the population and a total of \$90,000,000 to the present.

**"Still Worried Huns."**  
Ottawa, Aug. 2—A despatch from General Sir Arthur Currie, commanding the Canadian corps at the front, to Sir

## The Playgrounds

At the monthly meeting of the Playgrounds Association in the Y. M. C. A. last evening most gratifying reports were received from the six supervised grounds, where everything is working even more smoothly than in past years, with a good attendance of children. Besides free play and games there is some raffia work, knitting and sewing, and there will be a good display of work at the close.

A. M. Belding presided and there was a good attendance. Mrs. W. C. Good reported for the Bentley street ground, Mrs. A. J. Mulcahy for Carleton, Mrs. T. N. Vincent for Alexandria, M. E. Agar and Miss Leavitt for Centennial, Mrs. J. H. Doody for Allison, and Miss Goodwin and H. H. McEllan for Aberdeen. All paid warm tribute to the work of the teachers.

It was decided not to have a general closing this year, as last year's had to be postponed on account of the weather. There will be, however, a closing programme on each ground, to be arranged by the teachers and visitors for each week, and the citizens will be invited to enjoy the entertainment and inspect the work.

The teachers sent a request that the grounds be closed on Saturday afternoons as the attendance is small, but as the season is short and as one teacher on each ground gets Saturday afternoon off, working alternately, it was felt there should be no change.

The chairman reported the progress of the plan to have a neighborhood ball field in each of the four sections of the city, telling of what had been done in each court and west ends, and expressing the view that the playground outlook

## MORE TIME TO REPORT

Ottawa, Aug. 2—An extra of the Canada Gazette, issued at 7 o'clock in the evening contains a proclamation removing deserters and absentees under the Military Service Act from liability to punishment if they report for duty between now and August 24. It is recognized that many men who failed to report because of lack of a proper understanding of the act will be glad and will be to do so if a period of grace is allowed. It is believed that the establishment of such a period will bring to the colors many men whom it would be difficult to otherwise reach.

Men who are still classed as deserters and absentees subsequent to August 24 will, the proclamation states, be pursued and punished with all the rigor and severity of the law, subject to the judgments of our courts-martial, which will be convened to try such cases and other competent tribunals.

The proclamation provides that those who employ, harbor, conceal or assist such men will be held strictly accountable as offenders and subject to the pains, penalties and forfeitures provided by law provided for their offense."

## United States Judge Atkinson, Former Governor, Gives Opinion of Nuxated Iron

Says The Results He Has Obtained Have Been Simply Marvelous

It helps put vim and renewed energy into the veins of the weak, "run-down," nervous and aged—Often increases their strength in two weeks!

Of great importance to the public generally should be the opinion given of Nuxated Iron by United States Judge Atkinson. For twenty years Judge Atkinson has been in the public service as Judge of the United States Court of Claims at Washington, Governor, Member of Congress, and United States District Attorney, etc. He has had vast experience in weighing the evidence, in separating the truth from the false. Since Nuxated Iron, or "Per Nuxate," as the French call it, has been introduced into this country, it has taken the people by storm. Druggists everywhere are talking about its immense sale, it being estimated that over three million people annually are using it in this country alone. It has been highly endorsed and prescribed by well-known physicians like Dr. Schuyler C. Jacques, formerly Visiting Surgeon St. Elizabeth's Hospital, New York City. It has been used by many prominent men like Hon. Leslie M. Shaw, former Presidential Cabinet Official, former United States Senator and Vice-President nominee Charles A. Towne; former United States Senators Richard B. Kenney at present Asst. Judge Advocate U. S. Army, who bear unusually strong testimony as to its great strength and endurance giving properties. Former Health Commissioner Wm. R. Kerr of Chicago says it ought to be prescribed by every physician and used in every hospital in this country.

There are thousands of people who are nervous, "run-down," weak and anemic, who lack strength and vitality. They feel the need of something to build them up and put renewed energy into their veins, but they do not know what to take. It is therefore valuable to have a man like Judge Atkinson go into the merits of Nuxated Iron, test it on himself and then come out frankly and boldly and tell the people about it.

Judge Atkinson says: "Only this Spring I have tried your valued prescription, Nuxated Iron, as a tonic, and restorative following on the rigors of the past winter. The results have been simply marvelous. I have never had recourse to a medicine whose results were so satisfactory, so complete and so free from any of the incidental complications which indiscriminate dosing so frequently brings to the people who make use of medicaments."

Manufacturers' Note: Nuxated Iron which has been used by Judge Atkinson, and others with such surprising results, and which is prescribed and recommended by physicians is not a secret remedy, but one which is well known to druggists everywhere. Unlike the older inorganic iron products it is easily assimilated, does not injure the teeth, make them black, nor upset the stomach. The manufacturers guarantee successful and entirely satisfactory results to every purchaser, or they will refund your money. It is dispensed by Watson's Drug Store and other city druggists.

United States Judge G. W. Atkinson, former Governor of West Virginia, Member of Congress and United States District Attorney. Read his opinion of NUXATED IRON.

depleted, the body exhausted or the nerves run down. It has restored my appetite and my vitality. I feel that I have dropped off the burden of months of toil in the few weeks that I have been following the very simple directions for the use of Nuxated Iron."

If you are not strong or well, you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. Numbers of nervous, run-down people, who were ailing all the while have now astonishingly increased their strength and endurance simply by taking iron in the proper form.

It is without hesitation that I recommend Nuxated Iron to persons who in the stress of physical or mental labor have permitted the system to become
