Today we made a satisfactory advance and met with decided success. The work fell were three ninety-nines. The le met with decided success. The work fell entirely to Buller's troops and resulted in the capture of Bergendal, a very strong position two miles northwest of Dalmanu-tha. I met Buller at Bergendal shortly after it was reached by our troops. I am glad to find the occupation cost less than we feared on account of the approach being across an open glacis for two or three thousand yards and the determined stand of the enemy. The Inniskilling and second rifle brigade formed the attacking party. The latter suffered most. I hope the casualties do not exceed 50 or 60. One officer was killed and two were wounded. A good many Boers were killed and a pom-pom was captured."

The casualties are reported to be considerable "
