Pekin, Nov. 7—Li Hung Chang died at 11 o'clock this morning.

Pekin, Nov. 6—The physicians who visited Li Hung Chang at 10 o'clock last hight found him in good spirits, though extremely weak, as the result of sitting up and working, in defiance of their instructions. When they called this morning they found him unconscious and sinking rapidly. It was announced at noon that Li Hun. Chang could hardly live three hours longer.

Pekin, Nov. 6—At 9 o'clock this evening Earl Li is still breathing and displaying unexpected vitality. The physicians, however, think he will probably die in the morning hours. The burial clothes have already been put on The countyard of the Yamen is filled with life-size paper horses and chairs with coolie bearers which his friends are sending in accordance with Chinese custom to be buried when he dies in order to carry his soul to heaven.

Trouble, however, is extremely improbable.

Washington, Nov. 6—The death of this distinguished Chinese stateman will not, it is believed here, affect the execution of the undertaking imposed upon China in the protocol. Certainly the United States interests will not be involved directly, for all that remains to be done at Pekin in which the United States government is interested is the preparation of trade and commercial treaties and their

Carberry, Man. Nov. 6—(Special)—Harry Smith, a young Nova Scotian, was arrested near Brookdale and brought here today to stand preliminary trial for forgery. Smith and a companion, Hurley Lorraine, came west together this fall, during the farmers' excursions. On reaching Carberry both made deposits in the Union Bank, Smith of 860 and Lorraine \$40, for which each was given a deposit receipt. Some days are a man appeared receipt. Some days ago a man appeared at the bank and presented Lorraine's receipt and received \$40. The rightful owner afterwards turned up for his money, and the arrest of Smith followed.

WHAT MAKES YOU COUGH?

Did you ever wonder just what it is that makes you cough? In a general way it is understood to be an involuntary effort of nature to eject something from the breath pipe. As a matter of fact, merely a slight throat infiammation caused by a cold will cause a cough to start, and the more you cough, the more you want to cough. If you allay the infiammation in the throat your cough will stop.

Don't lull the sensitiveness of the throat with medicine containing a narcotic, but

on a plan of the circle. There are in the natural world straight lines, angles, parallel-ograms, diagonals, quadrangles, but these evidently are not God's favorites. Almost everywhere where you find him geometrizing you find the circle dominant, and if not the circle then the curve, which is a circle that died young. If it had lived long enough it would have been a full orb, a periphery. An ellipse is a circle pressed only a little too hard at

History tells us that in the making of the pyramids it took 2,000 men two years to drag one great stone from the quarry and put it into the pyramids. If men short lived can afford to work so, slowly as that, cannot God in the building of eternities afford to wait?

When men build churches they ought to imitate the idea of the Great Architect and put the audience in a circle, knowing that the tides of emotion roll more easily that way than in straight lines. Six thousand years ago God flung the world out of his right hand. But he did not throw it in a straight line, but curvilinear, with a leash of love holding it so as to bring it back again.

The world started from his hand pure and Edenic. It has been rolling on through regions of moral ice and distemper. How long it will roll God only knows, but it will in due time make complete circuit and come back to the place where it started the hand of God — pure and Edenic.

Halifax, Nov. 5—(Special)—Dr. Martin Murphy, of this city, has received the unanimous nomination of the Society of Canadian Engineers for the high position of president of that body. The Society of Canadian Engineers has a large membership. Dr. Murphy has been a member of the council of the society for several years. He has the presidency of the Nova Scotia Institute of Science. In 1896, the degree of D. S. C. was conferred upon him by Kings College.

The history of the world goes in a circle. Why is it that the shipping in our day is improving so rapidly? A scientific shipbuilder says it is because the inflamed parts are shifted if the all effect of attribute discharges and also from the ill effect of attribute of swallowing food. Such a remedy is obtained coughs. It is a soothing compound to the way of the passage of food and drink. The true cough remedy is something that with medicine coughs from the ill effect of attribute of swallowing food. Such a remedy is treat the ill effect of the ill effect of obtained such a seal of the most of many years has been conquering the most obtinate coughs. It is a soothing compound prepared from barks and gums. It been the form barks and gums. It been the form barks and gums. It been to the all effect of the work of Canadian Engineers has a large membership. Dr. Murphy has been a member of the council of the society for several years. He has the presidency of the Nova Scotia Institute of Science. In 1896, the beautiful property begin. It you once take Adamson's Balsam for cough, you will never be satisfied without some of it at hand for any new cough. A trial size of the Balsam the form the first of the work of the council of the society for several years. He has the presidency o circle. Why is it that the shipping

of gardening will grow for centuries, and after the Downings and Mitchells of the world have done their best in the far future the art of gardening will come up to the arborescence of the year 1. If the makers of colored glass go on improving, they may in some centuries be able to make something equal to the east window of York minster, which was built in the year 1290. We are six centuries be-hind those artists. But the world must keep on toiling until it shall make the complete circuit and come up to the skill of those very men. If the world continues to improve in masonry, we shall have after awhile, perhaps after the advance of centuries, mortar equal to that which I saw in the wall of an exhumed English city built in the time of the Romans 1,600 years ago, that mortar to-day as good as the day in which it was made, having outlasted the brick and the stone. I say, after hundreds of years masonry may

advance to that point.

If the world stands long enough, we may have a city as large as they had in old times — Babylon, five times the size of London. You go into the potteries of England, and you find them making cups and vases after the style of the cups and vases exhumed from Pompeii. The world is not going back. Oh, no! But it is swinging in a circle and will come to the styles of pottery known so long ago as the days of Pompeii. The world must keep on progressing until it makes the com-plete circuit. The curve is in the right direction; the curve Will keep on until it becomes the circle. Well, now, what is true in the ma-terial universe is true in God's moral government and spiritual arrange

ment. That is the meaning of Eze-kiel's wheel. All commentators agree use unless it turns, and if it turn it turns around, and if it turns around it moves in a circle. What then? Are we parts of a great iron machine

THE EARTH'S CIRCLE | whirled around and around whether we will or not, the victims of inexorable fate? No! So far from that I shall show you that we ourselves start the circle of good or bad actions and that it will surely come around again to us unless by divine intervention it be hindered. Those bad or good actions may make the circuit of many years, but come back to us they will as certainly as that God sits on the circle of the

Bible — Shakespeare copying his "Lady Macbeth" from her picture slew Naboth because she wanted his vineyard. While the dogs were eating the body of Naboth Elijah the prophet put down his compass and prophet put down his compass and marked a circle from these dogs clear around to the dogs that should eat the body of Jezebel, the murderess. "Impossible!" the people said. "That will never happen." Who is that being flung out of the palace window? Jezebel A few hours after they came around, hoping to bury her. They find only the palms of the hands and the skull. The dogs that devoured Jezebel and the dogs that devoured Naboth. Oh, what a swift, what an awful circuit!

But it is sometimes the case that this circle sweeps through a century or through many centuries. The world started with a theocracy for your children will wonder if you will never be taken away. They called you "father" once. Now they call you the "old man." If you live a few years longer, they will call you the "old chap." What are those rough words with which your children are accosting you? They are the echo of the very words you used in the ear of your old father forty years ago. What is that which you are trying to chew, but find it unmasticatable and your jaws ache

world started with a theocracy government - that is, God was the archy it is going to have a limited monarchy. After awhile the limited monarchy will be given up and the republican form of government will be everywhere dominant and recognized. Then the world will get tired of the republican form of government, and it will have an anarchy, which is no government at all. And then all nations, finding out that man is not capable of righteously governing man, will cry out again for theocracy and say, "Let God come back and conduct the affairs of the world." Every step—monarchy, limited monarchy, republicanism, an-archy — only different steps between the first theocracy and the last theocracy or segments of the great circle of the earth on which God sits. building of eternities afford to wait?
What though God should take 10,-Q00 years to draw a circle? Shall we take our little watch which we have to wind up every night lest it run down and hold it up beside the clock of eternal ages? If, according to the Bible, a thousand years are in God's sight as one day, then, according to that calculation the 6,000 years of the world's existence has been only to God as from Monday to Saturday.

But it is offen the case that the re-bound is guicker, the return is much quicker, than that. The circle is somer completed. You resolve that you will do what good you can. In one week you put a word of counsel in the heart of a Sabbath school child. During that same week you give a letter of introduction to a young man struggling in business. During the same week you make an is all gone. You will never near of it perhaps, you think. A few years after a man comes up to you and says, "You don't know me, do you?" You say, "No; I don't remember ever to have seen you." "Why," he says, "I was in the Sabbath school class over which you were the teacher. One Sunday you invited me to Christ; I accepted the offer. You see that church with two towers yonder?"
"Yes," you say. He says, "That is
where I preach," or: "Do you see that governor's house? That is where I live." that

one day a man comes to you and says, "Good morning." You look at him and say, "Why, you have the advantage of me; I cannot place you." He says, "Don't you reinember thirty years ago giving a letter of introduction to a young man — a letter of introduction to william F. member no more." "Blessed is he whose transgression is forgiven."
But, do not make the mistake of thinking that this doctrine of the circle stops with this life. It rolls on through heaven. You might quote in opposition to me what St. John says about the city of heaven. He says it "lieth four square." That does seem to militate against this idea of a circle. But do you

of introduction to a young man — a letter of introduction to William E. Dodge?" "Yes, yes, I do." He says: "I am the man. That was my first step toward a fortune. But I have retired from business now and am giving my time to philanthropies and public interests. Come up to my house and see me."

But sometimes it is a wider circle and does not return for a great and does not return for a great while. I saw a bill of expenses for burning Latimer and Ridley. The bill of expenses has these items

making in all 25s. 8d. That was cheap fire, considering all the circumstances, but it kindled a light which shone all around the world and aroused the martyr spirit, and out from that burning of Latimer and Ridley rolled the circle wider and wider, starting other circles, convoluting, overrunning, circumscribing, overarching all heaven — a circle.
But what is true of the good is just as true of the bad. You utter a slander against your neighbor. It has gone forth from your teeth. It will never come back, you think. You have done the man all the mischief. have done the man all the mischief you can. You rejoice to see him wince. You say, "Didn't I give it to him!" That word has gone out, that slanderous word, on its poisonous and blasted way. You think it will never do you any harm. But I will never do you any harm. But I am watching that word, and I see it beginning to curve, and it curves around, and it is aiming at your heart. You had better dodge it. You cannot dodge it. It rolls into your
