

2. Measures

All efforts should be made to take the following urgent measures to finance the development of developing countries and to meet the balance-of-payment crises in the developing world:

(a) Implementation at an accelerated pace by the developed countries of the time-bound programme, as already laid down in the International Development Strategy for the Second United Nations Development Decade, for the net amount of financial resource transfers to developing countries; increase in the official component of the net amount of financial resource transfers to developing countries so as to meet and even to exceed the target of the Strategy;

(b) International financing institutions should effectively play their role as development financing banks without discrimination on account of the political or economic system of any member country, assistance being untied;

(c) More effective participation by developing countries, whether recipients or contributors, in the decision-making process in the competent organs of the International Bank for Reconstruction and Development and the International Development Association, through the establishment of a more equitable pattern of voting rights;

(d) Exemption, wherever possible, of the developing countries from all import and capital outflow controls imposed by the developed countries;

(e) Promotion of foreign investment, both public and private, from developed to developing countries in accordance with the needs and requirements in sectors of their economies as determined by the recipient countries;

(f) Appropriate urgent measures, including international action, should be taken to mitigate adverse consequences for the current and future development of developing countries arising from the burden of external debt contracted on hard terms;

(g) Debt renegotiation on a case-by-case basis with a view to concluding agreements on debt cancellation, moratorium, rescheduling or interest subsidization;

(h) International financial institutions should take into account the special situation of each developing country in reorienting their lending policies to suit these urgent needs; there is also need for improvement in practices of international financial institutions in regard to, inter alia, development financing and international monetary problems;

(i) Appropriate steps should be taken to give priority to the least developed, land-locked and island developing countries and to the countries most seriously affected by economic crises and natural calamities, in the availability of loans for development purposes which should include more favourable terms and conditions.
