

The Famous Garden City Feeder

The Only Band-Cutting and Feeding Device ever placed upon the Market that actually Feeds a Threshing Machine as it should be done.

Now is the time to prepare for threshing; don't wait until harvest arrives, when everybody is overworked. You need a Garden City Feeder attached to your machine because it will make money for you, by feeding your separator so evenly that nine-tenths of the usual stops, breakdowns and delays will not occur. It will prevent the troubles caused by careless, ignorant or mean pitchers. They may pile the grain in as fast as they please, and in any manner, the Garden City Feeder will deliver it to the separator in a constant and even flow; never too much; never too little, and every sheaf end first; thus securing the best possible work without any delays. Think what it would mean to you. No slugging; no overloaded straw racks or sieves; no clogged blower or broken belts; no cylinder to dig out; no stops; no delays; just a steady run from morning till night, day after day, while the weather remains good; your threshing done and your grain sold before winter.

Think it over. Satisfaction guaranteed or your money back.

it was not thought wise to make this plan larger.

The basement allows for coal, wood, fruit and vegetable storage, and for a dairy and laundry. There is also space for lines for drying clothes in winter. The cistern is placed below the basement floor away from the frost. By doing away with the large galvanized iron basement tank, so commonly used in the Northwest for rain water storage, more basement space is provided. A detailed plan of the basement is shown in the working drawings.

Anyone who attempts to plan an ideal house will soon come to this conclusion—that it is impossible to get all the desirable features in a limited amount of space. One thing crowds out another. This is especially true of the small home. The smaller it is, the harder it is to plan so as to get what is wanted. So with this House Plan "A." It is not perfect; but the writer has seen few plans adapted to farm conditions that have made such good use of the limited space and incorporated as many good ideas as are to be found in this house.

Working drawings, showing front and two side elevations, sectional elevation, basement plan, exterior and interior details (6 sheets 14 x 24), together with specifications and a bill of material can be had by writing the Department of Agricultural En-

gineering, Manitoba Agricultural College, Winnipeg. This material is sold at a nominal price with no intention of securing a profit, but to cover the cost of the reproduction of individual copies. The cost to applicants residing in Manitoba is \$3.00 and for those residing elsewhere \$5.00. Applicants, when sending for this material, should allow plenty of time for the getting out of copies of the specifications and bills of material.

Producing Is a Privilege

It is an inherited privilege accorded to each and every individual to produce something, but it is a crime for any individual to waste that which has already been produced. It is only a catastrophe like the present war that makes us realize the absolute importance and necessity of adhering strictly to a programme of conservation.

For centuries the civilized world has devoted a great deal of its time and attention towards producing an era of peace, and a great many of us deluded ourselves into the feeling that such an era had been reached. Overnight as it were, however, Germany and her allies destroyed practically everything that had been done up to that time for the cause of peace on earth and good will towards men.

PURE BRED SHETLAND
