

When The Corn Is Ready To Harvest For Your Silo

you want an ensilage cutter that saves as much labor and time as possible—a cutter that does not require a powerful engine to operate nor clogs when feeding either green corn or dry fodder fast. The machine you need is the

GILSON PAPEC Ensilage Cutter

The one blower cutter you can operate successfully with as small as a 4 h.p. gasoline engine. Not chain driven—there is no lost motion—heavy gears transmit all the power. The "Papec" cuts silage into fine and uniform lengths without stalling. The throwing, blowing, lifting force carries the silage rapidly up into the silo in a steady, full stream, distributing so it packs perfectly. This helps keep the ensilage fresh and sweet.

A good range in the big things and a good range in the small things

In the big, essential points of range merit, the "Kootenay" excels. One of these is durability, which is ensured by our use of "ARMCO" rust-resisting iron for the body, and Semi-Steel for the firebox linings. Another is cooking quality. The "Kootenay" has always been famous in this respect, and with good reason. The nickelled steel oven is one factor, the scientific flue arrangement and oven ventilation are others.

Points of minor importance, but which are much appreciated by housewives in

McClary's Kootenay Range

are its convenient high closet, its large oven, its handsome appearance with a profusion of sparkling nickel, its roomy broiler door, convenient dampers, etc.

You should read the full story of the Kootenay. Doing so makes you able to more greatly appreciate its good points when personally inspecting it at the store of your merchant.

Do not hesitate to write to us for the free booklet. Use coupon below.
