

PEERLESS PERFECTION

The Fence That's Locked Together

It's close enough to keep small fowl in and strong enough to keep large animals out. Securely locked together at each intersection of the wires. It's many times heavier and stronger than poultry netting, and being well galvanized, will last many years longer. Top and bottom wires are extra heavy. No top and bottom boards required. PEERLESS Poultry Fence is built so strong and heavy, that but half the ordinary number of posts are required. It gives you real fence service.

Here's How Strong It Is

Dear Sir: I am writing a testimonial as to the strength of PEERLESS Junior Chicken Fencing. Mine is four feet high. It turned two horses each weighing 1200 pounds. They ran full tilt into the fence about 2 rods from each other at the same time. The result was that they both turned a somersault over the fence, alighting on their heads and necks, scratching them up some, but the fence remained intact. Yours truly,
Surrey Center, B. C. Joe Rothford

Think of it—a poultry fence strong enough to withstand the combined weight of two big horses. And that without a top or bottom board either. If you are interested in such fencing, write us. Ask for our literature. We also manufacture farm fence and ornamental gates.

Agents wanted everywhere. Live agents wanted in unrepresented territory.

Aylmer Superior Lever Force Pump

For Hand and Windmill use. Has Six, Eight, and Ten-inch Stroke. Adjustable Base.

Fig. 36 represents our Superior Lever Pump, fitted for hand and windmill use. Made in 1 1/2 and 2-inch.

This style of lever and fulcrum has several advantages over the ordinary style; having longer stroke the power is greater, making it work easier. The handle, being wood, they are not so liable to break in frosty weather.

The base is adjustable admitting of top being raised or lowered to any position desired.

The handle is drilled for three lengths of stroke. Six, eight, and ten-inch stroke.

This is readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross-head on top.

Cylinders capped inside require to be two inches longer to obtain same stroke.

This pump is adapted for all depths of wells; furnished with Iron, Brass Body or Brass Lined Cylinder. You'll never regret placing

one of these pumps on your farm. Write us to-day for prices and illustrated catalogue free.

Alpha Gas Engines Are Farm Burden Bearers

The "Alpha" is a good engine for any purpose, but because there is no "mystery" in either its construction or operation it is ideal for farm use.

It isn't built of rough castings and high grade watch.

put together like a stove. It's built more like a high grade watch. It starts and runs on a slow speed magneto. That means you have no batteries to fuss with or to exhaust themselves.

You just give it a supply of gasoline or kerosene, oil it up, give it a pull and away it goes and saws your wood, cuts your fodder, grinds your feed, pumps your water, runs your cream separator or your washing machine, or anything else you want it to do. No worry, no bother, no tinkering—just plugs along like a steady well-broken horse.

Every farmer ought to have an "Alpha." Send for new catalog.

You Could Buy an IDEAL GREEN FEED SILO

every year and still be money ahead.

If you keep cows or raise stock you are losing money every year you try to get along without a silo.

Get our Silo Book and learn how to make more money with silage.

Farm Planning

THE farm is a combination of a business establishment and a home. Economy of labor is necessary to one and pleasant surroundings to the other. A haphazard arrangement of buildings, a poor location of entrances and drives, an inadequate water supply, or inefficient drainage are constantly reducing the income and making the home life a burden to all the family.

There is no greater influence toward keeping the young people interested than in well-developed grounds, where the business part presents an appearance of system and around the house are graceful trees, pretty flowering shrubs and well-located walks and drives.

Our Landscape Architect is a graduate of a leading agricultural college, where he has made a thorough study of farm planning, which, combined with broad experience, enables him to handle your problems intelligently and accurately.

Let us take up your problems now, and you may act this spring.

Write us at once for further information.
