**ORDER YOUR "EMERSON" NOW**  
For Fall and Spring Work

**Here's the Reason—**

Hundreds of farmers have tried to buy an Emerson Mill for the past several years only to meet with disappointment. The fact that it is now manufactured in Winnipeg, however, does not mean that YOU or any other farmer will be able to buy one next spring. The question of material is the biggest problem every manufacturer is face to face with. We cannot say today how many we can manufacture. But, if you would send us your order now we will guarantee delivery at once or at some future date.

The efficiency of Emerson Grain Cleaners has made this tremendous demand for them. A Fanning Mill is judged on its work, and work alone. If there is a farmer in your district who owns one you know it—and will want it. If you know nothing about this wonderful mill and have an opportunity to judge it write us today for full particulars, or better still, send us a sample of your seed and we will be pleased to demonstrate the kind of work it does. Remember—hesitation may mean disappointment for another year!
