

Three Kinds of Lightning.

Lightning often injures without destroying life. Its effects may properly be classed into those that are mild, severe, and fatal in their character.

In mild cases the person struck may or may not lose consciousness for a brief period of time. There may be a temporary paralysis of one or more of the limbs for a few hours. Vomiting and nausea sometimes occur.

In severe cases the victim may be knocked down with violence or may be thrown several feet and lose consciousness. External injuries may be found, such as burns and bruises. There may be fractures of bones or bleeding from the nose, ears or mouth.

Deafness is a common symptom, and is due to rupture of the ear-drum. In fatal cases death is usually instantaneous, but it has been known to occur after the lapse of several days from secondary causes. It may be caused by asphyxy, or by rupture of the heart or large blood vessels.

Tennyson as a Mesmerist.

Tennyson had extraordinary mesmeric powers, says the Boston Herald's correspondent. He went, as a young man, with his wife to some country inn, and soon after his arrival a doctor called, who having introduced himself said: "I am having introduced to me a lady who is suffering from severe physical ailments, and I want you to come and try your mesmeric powers on her, because I am quite convinced that you have strong mesmeric powers."

When you go home at night and find that all is well with your own flesh and blood, do you go to sleep reasoning that the rest of the world must care for itself? Do you ever shut your eyes and call up the hundreds of faces you have met during the day, and wonder if the paleness of death will cover any of them before the morning?

Old English Game Laws.

A little book printed in London in 1750 gives some account of the early English game laws. In 1289, during the reign of Richard II, a law was enacted which forbade all persons to hunt or destroy game who did not, as laymen, possess an income of forty shillings a year, and if a clergyman, one of ten pounds sterling. Trespassers after game became so troublesome that a law was enacted in 1495, under Henry VII, imposing a penalty of ten pounds upon any person who destroys a game on the lands of another without a special license from the owner or possessor.

About Telephones.

The Swiss telephone system is claimed to be the best and cheapest in Europe. It is now under government control. The first telephone was used at Zurich, in 1880, when a private company started with 144 telephones. In 1886 the government undertook the working of the system, and the number of subscribers increased to 1,000. In this year the net profits were over 130,000 francs. In 1890 the subscribers numbered 8,000. On an average there were 546 calls a year to each telephone. The government allows 800 calls to each subscriber without extra charge, and all calls beyond that number are charged for at one cent each. The usual charge to subscribers is \$24 the first year, \$20 for the second year and less than \$16 per year from then on. Telegrams are received at the telephone office and delivered to the telegraph department at two cents each.

Great wealth pursued as an end is a curse to any member of the human family. There is no such such self-advancing, hell-bellied, suicidal occupation on earth as the selfish piling up of surplus wealth as the object of life. The possessor of millions who goes on adding to his store as a gratification of his insane ambition to accumulate, and lives without a conscientious regard for his obligations to his fellow-men, is surely kindling within himself that torment which Divine reprobation because he is defying the supreme laws of his nature. It is not the fact of the millions, for money is useful, but that their selfish possession will eventually in a self-made hell in the human soul. . . . Bion once said of a miserly rich man, "That man does not own his estate, but his estate owns him."

Prof. Robertson, Dominion Dairy Commissioner, has returned from England. He states that he has received an offer from a leading English merchant to purchase the mammoth cheese, which is to form the base of the Canadian pyramidal cheese, after the fair is over. The price offered will recoup the department for all the expenses of manufacturing the cheese. The intending purchaser undertakes to exhibit the cheese free of expense to the department and without charge to the public in every city of commercial importance in Great Britain and Ireland. Moreover, he will also spend \$15,000 in advertising it as the largest cheese in the world.

Why He Quit.

"Is that 'Whiskey Bill,' the chap who used to drive the old white horse in front of an express wagon?" asked the man, in tones of surprise.

"Yes." "Well, now, it's a curious case," he slowly continued. "We all thought he'd gone to the dogs, for sure, for he was drinking a pint of whiskey a day; but a few months ago he braced right up, stopped drinking, and now I hear he's in good business and saving money. It beats all, for the last time I saw him he seemed half underground."

When you go home at night and find that all is well with your own flesh and blood, do you go to sleep reasoning that the rest of the world must care for itself? Do you ever shut your eyes and call up the hundreds of faces you have met during the day, and wonder if the paleness of death will cover any of them before the morning?

"So 'Whiskey Bill' was hunted down. An inquiry here and there finally traced him to a little brown cottage on a by street. He sat on the step in the twilight, a surly, broad-shouldered man of fifty, and in the house three or four children gathered around the lamp to look over a picture book.

"Yes, they used to call me 'Whiskey Bill,' down town," he replied, as he moved along and made room, "but it's weeks since I heard the name. No wonder they think me dead, for I've not a eye on the old crowd for months to come."

"And so you left your motherless children at home, and went out and got drunk?"

"No, I said I meant to but I didn't. The poor things were crying all day, and after coming home from the fair, I thought to get them tucked away in bed before I went out. Drunk or sober, I never struck one of them a blow, and they never ran from me when I staggered home. There's four of 'em in there and the youngest isn't quite four years yet. I got the older ones in bed all right, and then came little Ned. He had cried himself to sleep, and he called for mother as soon as I woke him. Until that night I never had that boy upon my knee, to say nothing of putting him to bed, and you can guess these big fingers made slow work with the books and buttons. Every minute he kept saying mother didn't do that way, and mother done this way, and the big children were hitting their heads under the quilts to drown their sobs. When I had his clothes off and his nightgown on, I was ashamed and put down; and when the oldest saw tears in my eyes, and jumped out of bed to put her arms around my neck, I dropped the name of 'Whiskey Bill' right there and forever."

"And little Ned?"

"Mebbe I'd have weakened but for him," replied the man, as he wiped his eyes. "After I had got the child's nightgown on, what did he do but kneel right down beside me, and wait for me to say the Lord's Prayer to him! Why, sir, you might have knocked me down with a feather! There I was, mother and father to him, and couldn't say four words of that prayer to save my life! He waited and waited for me to begin as his mother always had, and the big children were waiting, and when I took him in my arms and kissed him, I called heaven to witness that my life should change from that hour. And so it did, sir, and I've been trying hard to lead a sober, honest life. God helped me, no doubt, but I shall call me 'Whiskey Bill' again."

The four children, little Ned in his nightgown, came out for a good-night kiss, and the boy cuddled in his father's arms and said: "Good-night, pa—good night every-body in the world—good night, ma up in heaven—and don't put out the light till we get to sleep!"
