Dartmouth Woman Gets Rid of Indigestion and Gains Twenty Three Pounds

The story of how a young wife, who for four years has been a martyr to indigestion and its attendant evils, has been restored to perfect health and strength again, is one of the most pleasing which it has been our privilege to publish. The following statement was made by her husband Mr. Edward Ford of 34 North Street, Dartmouth, N.S., who is employed by the Imperial Oil Co., in Halifax, a few days ago.

"This is the seventh bottle of Tanlac that I have bought for my wife, and I am more than gratified with the results, It may seem hardly credible but nevertheless it is true that she has actually gained twenty-three pounds in weight and is in better health-to-day than she has been for

"For four years now she has been a suf ferer from indigestion and stomach tromle She was never able to eat a meal without had to force herself to eat in order to live but whatever she ate only caused her pain and distress. She was also subject to New Brunswick for the year comes severe sick headaches and her nerves were mencing on August 1st next, will be so bad that she couldn't sleep at night, published in the Royal Gazette this but would wake up every few minutes hasn't known what it was to be really dition that she couldn't do her housework The pulopesed special meeting of and about. She had faller off until she the Provincial Government, that wis only weighed a hundred and one pounds and was almost a wreck.

"None of the many medicines prescribed for her ever seemed to meet her case. and at last in sheer desperation I decided to give Tanlac a trial. Its effects was immediate and indeed truly marvelous. The

The July Sale at Creaghans' Ends Saturday, July 31st.

And we have gathered together all broken lots and marked them at prices that will mean a complete clearance.

This is the Final Call and thrifty people will heed it and save. Everything points to a record ending for the mightiest sale we ever held.

indigestion and stomach troubles were soon over-come. Before long she had a keen appetite and found that she could week. Premier Foster was quoted on and many a night would hardly close her eat meats, fruit or vegetables without eyes at all. I am safe in saying that she having to suffer from it afterwards. Her nerves have got steady and strong and well for a single day during the past two she can now sleep fine. As I said before year, and for over a year now she has she has gained twenty-three pounds in been in such a weakened, run down conweight, and is so much stronger that she weight, and is so much stronger that she can now do all her own housework. Totil they appear in the Royal G zette. and was only just about able to keep up day she is the picture of health, and I have to thank Tanlac for it.

Morris, in Redbank by M. Sullivan and in Doaktown by O.

St. John Exhibition

The Proposed Public Health Exhibit

Public Health Exhibits have been attempted to a greater or less degre in the Maritime Provinces at various times, but it has remained for the St. John Exhibition to make this a distinctive and complete feature. At the coming Exhibition to be held from September 4, to 11 there will be a department devoted to a very comprehensive exhibit of this kind. This will be under the auspices of the New Brunswick Department of Health and will have the assistance of a large number of societies whose objects include work along philanthropical or public welfare lines, such as the Canadian Red Cross, Victorian Order of Nurses, Ambulance Association, Play Grounds Association and many other similar bodies. It is proposed that the entire exhibit comprise some twenty booths each dealing with one phase of the subject. It is also proposed to run a Baby Show for one or two days and doubtless there will be much competition for the prizes offered in this connection; possibly also some heart ourning among the different mothers whose offspring fall to qualify for first place. It can hardly be doubted that an exhibit of this nature with ts great educational value will prove

PURCHASED PROPERTY

Hon. B. Frank Smith. M. L. A., has purchased the property of the la'e alexander Gilson, Jr., fo.mer M. P. for York, at Maxyaville and, it is unfor York, at Maryaville and, it is understood, will remore from Bast Florenceville, Carl-ton county, and take up his residence there about September 1st. The purchase price is said to have been 410,000. The property consists of a modern residence and 86 acres of ground and is located near the Methodest church, in one of the best residential portions of Manyaville. It is understood that Mr. Smith has business interests which made his change of residence convenient. The transfer of the property was concluded by the Oits and Thomas Company.

Notice To Advertisers

trons is requested in the director of getting "copy" into the fice on or before 5.30 p. m. on Monoffice on or before 5.30 p. m. on Mon-day. Very often the receipt of a large advertisement or even regular changes after that hour serves to dis-locate the regular work of getting the paper mode up in time to eaten the mails—and not infrequently such ass, are at the last moment left out. This altraston in not of carries to solute the networker programmed we therefore, request that copy be received in the office betters \$.30 p.

Coal in British Columbia and Alberta

At present there are three main districts where mining operations are being actively pursued. These are the Crow's Nest, Pass region, in the eastern part of the province; the Nicola Valley district in the central part; and the eastern side of Vancouver Island. Besides these, other coal basins are known, and more or less prospected, but the lack of transpert and communication have hampered any extensive development yet they constitute a reserve of great possibility.

The Crow's Nest coal field is the most important body of coal being mined in British Columbia, and includes an area of 230 square miles.

The coal is night grace of tentialized, averaging 64 per cent fixed carbon. There are 21 workshide earns with a total thickness of 116 feet, 106 feet of which is estimated as workshid. In addition to this there are other coal bearing areas in southern British Columbia, socially at Princeton, within the southern British Columbia, socially at Princeton, within the in a feet of 50 quantum mitten, and is a fixed of 50 quantum mitten, and is a fixed of 50 quantum mitten, and sankysis about 67 per cent fixed early of the control of

proximately parallel to the Rockies and extending from the international boundary to about latitude 55". It is ustimated that the these beds there are 789,600 million tons of lignitic or sub-bituminous coal, and 11,858 million tons of low-carbon bituminous. The Belly River formation complex a considerable area in the southples a considerable area in the section, the western part of the province, the most important seam being in the wicinity of Lethbridge. The probable vicinity of Lethbridge are lignite, 25
