## A Kind of Boarder.

mostitute will probably be into which they will be admitted.
The Presbytery unanimously agreed to the forwarding of the memorandum to the General Assembly.

This drew from counsel the suggestion that the animal was a sort of boarder. The case was brought by the S.P.A. inspector, Mr. Jonas Barter, who charged a farmer with neglect of a horse to the extent that the animal had been compelled to feed off the rafters in the stable. Defendant's niece said the horse got three square meals a day. The Judge, in dismissing the case, said accused had better not keep a horse in future.

### Captain's Crew Was a Pirate Gang.

Stories of flying fists and knives in

the farecastle, mutiny in foreign

ports, succor from an American destroyer in a Russian port, the murder of British soldiers in Constantinople and the subsequent hanging of two seacooks—all these, and other fantistic things, were told on May 10th by Captain John Bergsten, the strapping, two-fisted master of the Shipping Board freighter Eastern Ocean, which arrived in New York with no cargo, but 120 tons of cement blocks in her hold to keep her afloat. He declared that after he got to sea on a quiet day early in January, he discovered his crew was mainly made up of a piratical gang from the Philidelphia waterfront. Hostilities developed the first day out, the cooks starting the trouble. The men formping, two-fisted master of the Shipstarting the trouble. The men form-ed rings, goading on their belligerent shipmates till a nose was broken and a head cracked. Feeling became so embittered that, not content with using their fists in their disputes, the crew began duelling with knives and iron bars until a number were incapacitated. This went on day after day. Then came a storm, and the ship sprang a leak. Several who tried to desert in a small boat were induced to remain by application of a belay-ing pin. Then the mutiny started when the chief officer demanded salvage for rescuing the vessel from complete destruction. It reached such proportions that Capt. Bergste was forced to signal a destroyer from which 40 sailors with some officers came on board and battled with the malcontents; subdued them, and arrested the leaders. Two of the cooks murdered two British soldiers in Constantinople, and the United States authorities there took charge of the case, Capthere took charge of the case. Cap-tain Bergsten said he understood the men had been condemned to be hang-

## A Musical Education!

Next time you are in a house where there's a Diamond Amberola, watch the youngsters. They can handle the machine and records without Mother worrying about breakages. Notice the tiny tots trying to sing, and then ask yourself whether the way is being paved for your own children to acquire that greatest of accomplishments—a musical education. The New Edison Diamond Amberola is on view at 178 Water Street.

## Tarvia Prevents Dust: Tarvia Preserves Roads.

In the United States and Canada Tarvia is the standard by which all are judged.

Tarvia is made in three grades,-Tarvia B" for preservation of road surface and "Tarvia K-P" for repairing roads. Both "Tarvia B" and "Tarvia K-P" have been used in St. John's Municipal works for several

"Tarvia B" actually enters the road surface, acts as a cement and resists the tear and wear of traffic. By cementing together the dust particles "Tarvia B" prevents the for-

After the application of "Tarvia B" to a road surface a thin layer of sand should be applied to take care of the excess liquid and to prevent tracking. This layer of sand will prevent Horses from slipping and Automobiles from skidding and will prolong the life of the road surface. Broken stone is not as satisfactory or as economical as sand for this

A road after being treated with "Tarvia B" does not become muddy in rainy weather, but sheds the water and dries off quickly after the rain, leaving the road in admirable ondition while untreated roads are still deep with mud.

"Tarvia B" surfacing should be apolied annually but only when roads are in good condition and free from surplus dust. All holes and depressions should be repaired with fine broken stone and "Tarvia K-P." When "Tarvia B" is applied by

mechanical sprinkler, care should be taken to have men with brooms and hand sprinklers go over the ground so that excess "Tarvia B" may be brushed out and not allowed to run waste and so that hare spots be treated and the entire road surface

A loose, "happy-go-lucky" applica-tion is sheer waste of time and money, "whatever is worth doing, is worth doing well."
"Tarvia B" is admirably adapted

the treatment of sidewalks and walks in parks, hospital grounds and cemeteries. Wooden planking of bemeteries. Wooden planking of bridges will last longer if treated with "Tarvia B." Fence posts, sills and houses etc., will be greatly benefitted by treatment with "Tarvia B."

Further particulars will be gladly given upon application to
