Don't Swat the Flyl

He's a deadly gentleman-a dirty tramp at best, and not at all the proper playmate for your children. His manoeuvres in a dining-room may be entertaining, but the pest has got no manners. Invite him in today, by the open door or window, and he'll have all his friends and relations (even unto the thirtieth and fortieth generation), buzzing around your shack tomorrow, the same as if he owned it. And the whole breed will drop muck from their scow-like feet into your broth when they're not dancing a jid on your butter. Keep the disease-

Ferguson Fly Screen

will do that for you. Once it's on the nerviest fly can't get his eye-lash in. It keeps him outside, where he belongs, The Ferguson Screen is built on a new principle. The frame is done away with. The main body of the screen is one clear strip of wire cloth, which cannot shut out the light or obscure the vision. There is nothing about this screen to get out of order. Whether in use or not, it is always on its place outside the sash. The sash can be raised any height desired, from quarter of an inch to 18 inches, the screen fitting snugly, it does not matter what position the window may be in. When you want to close the window you don't have to take screen

out. It occupies its place permanently, If you want a perfect screen, perfectly made, of high-grade materials -a real Fly-Defier-you will buy the Ferguson Screen. PRICE: 50 CENTS AND UP.
