He says the colony has been a failure because of the mistake made when the Dominion government did not take hold of the work of settling the people after they got here. We were promised abundant provisions on our arrival, and the settlement was reached. Even a tent was pitched, and there were no stores where provisions could be bought. The Rev. M. Lloyd informed the settlers that work would be done for us on reaching the settlement, and there was no work. This colonization scheme was finally abandoned, according to Mr. Ferguson.
