

THE TORONTO WORLD.

SATURDAY MORNING, JAN. 31, 1885.

The History Commission.

The substance of the report of the history commission, of Vice-Chancellor Proulx, and Judge Senkler, presented to the legislature yesterday, is that there was a plot to overthrow the Mowat government by means of bribing some of its supporters in the house to vote against them, and that Christopher Baffling, Edward Meek, Joshua A. Wilkinson, F. A. Kirk, and Stinson, alias Lynch, were principals in the nefarious undertaking. The co-operative papers may deny it until they are black in the face, but it is none the less true that such a plot existed, and that the men indicated were its promoters. The record of these men has been in harmony with their disreputable act: they have been party hacks and party tools for years and were commonly known as such. Furthermore, if anything was needed to clinch the conviction it is found in the ravings of the Mail newspaper, which has used columns upon columns of its space in attempts at whitewashing these men, among whom was its reputed managing editor. Still more disreputable was the attempt of that paper to turn public attention toward Mr. Mowat and his colleagues as the real conspirators. The duty of the conservative party is to throw these men out, not defend them, and Mr. Meredith is doing himself no good by being too anxious over their fate. The great bulk of the conservative party is at least ignorant of the plot, and this great majority ought to be honest enough, powerful enough, to compel Mr. Bunting to take a back seat. He was caught red-handed, convicted of conspiracy and bribery, and all this evidence that the Mail may choose to publish will not save him from the disgrace that his conduct has brought upon him.

The Anglo-Italian Alliance.
We know what the new Dr. Wild's prophetic seal may take of this Anglo-Italian alliance, or to what extent the future of the lost tribes may be involved in it, but to the unimpaired mind it is a pretty broad intimation that Germany, Russia and France are not to be permitted to dictate to the rest of Europe, as they have made threats of doing recently.

Italian statesmen have long been ambitious, and to some purpose. Their alliances have not been at all sentimental. They wooed first the third Napoleon, next Bismarck, and now it is Gladstone. Thanks to their diplomacy Italy has become no despotic factor in European politics. She has a respectable navy, a considerable army and some prestige. There is no power to whom she could be so useful, or to whom she could help her so much, as Great Britain. Italy is strong enough to be of great help in solving the Egyptian problem, but not powerful enough to be dangerous when the spoils are being divided. Italy's contiguity to Egypt, and the step that she has already taken in that direction, suggest the surmise that perhaps Mr. Gladstone's promised withdrawal from the Nile may be followed by an Italian occupation, with England's consent of course. This idea may seem far-fetched, but stranger things have happened. Such an occupation would relieve the British government of one of its perplexities, and would open up to Italy a field of activity that she long has sought. What with the straits of Gibraltar at one end, the Suez canal at the other, and the Italian boot between the two, the Mediterranean is an Anglo-Italian lake, and there is no power on earth can say the word upon its shores.

This Anglo-Italian alliance is an important one, we think, a wholesome combination. It bodes no ill to men of good will, and it may act as a check upon the appetites of land hungry tyrants.

The Week and the Postmaster.
We have been looking for some reply in the Week to that paper's editorial attack on the city postmaster. The truth would appear to be that the editor of the Week, aware of an old-time feud between the parties, was, we suspect, under the impression that in discharging the Mail's spiteful attack on Mr. Patterson, he was propitiating an ally contributor known by the name of Bygones in fact may have attributed the Week's attack to that gentleman; but we have reason to know that he did not pen nor inspire the article in question. An editor who undertakes to write a slashing personal attack on the head of a busy department because he may have experienced a petty delay in a packet, surely misunderstands his public mission.

The intimation that Mr. Patterson neglected his office in favor of his farm should have been investigated before it was published. The postmaster does not visit his farm once a month in winter, and is there only on Sundays in summer; and he is probably as likely to be absent as he is to be present. We should not now have averted to the subject had not Mr. Patterson, who is quite able to defend himself, reminded us of it long. Probably he is satisfied like the immortal Wren to point to his work and say "Circumstances." To say that "diagnosed mismanagement characterizes the Toronto postoffice" is to say what everybody knows to be untrue, and the language of the Week's article, to say the least of it, is such that supporters of a journal of its pretensions must have read with regret.

According to that veracious organization, the Associated Press, nearly every public institution in London has been threatened, not even excepting the children's homes or hospitals. One of the threats uttered against the British museum, a building that not England alone, but the whole of civilization, is interested in protecting from the hands of vandals. The destruction of even a portion of that institution means a loss that no sum of money can ever make good, the most precious scientific and literary treasure of the globe being deposited there. Situated in a part of the city away from the busy

centres, covering seven or eight acres of ground, and with many nooks, corners and crevices, the museum unfortunately offers facilities for the damnable work of the dynamiter as great, if not greater, than any other public institution. It will, therefore, require many pairs of watchful eyes to shield it from harm, and we sincerely trust they will be forthcoming.

The Monetary Times backs up the president of the board of trade when it says: "The Canadian government pays an unduly high rate for savings bank deposits and thereby compels the chartered banks to self-protection, to follow its example. The complaint is just, and a remedy ought to follow."

Money, like other things, is just worth what it will bring or what it can be got for: the government probably find that it pays them to give 4 per cent. for it, and so do it. We imagine we see the bank managers going in a body and telling the finance minister that they are solicitous for the "dear borrowers," and that if the good minister would only keep down the interest on the savings bank deposits they would reduce the rate to the dear borrower, whose welfare is their greatest concern. The World would like to see the rate of interest reduced, and suggests that the kind bankers begin the good work, leaving the government to follow the example.

Our contemporaries generally are very much at sea regarding the wooden commodity of the British forces at Abu Klea and Shebaca Walls. They have been giving sketches of the career of Gen. Sir Donald Martin Stewart, G.C.B. Had they watched their own despatches they would scarcely have fallen into the error, for they would have learnt that, as a reward for his bravery and skill, the gallant soldier was only made a major-general on the new of his victory of the 19th last, preceding the London on Saturday last. Before that time the successful commander of the British division was simply Colonel Sir Herbert Stewart, K.C.B., A.D.C., of the 3rd Dragoon guards.

The senate is in session at Ottawa, likewise the commons. The Ontario legislature is concluding with the typhoid fever down on Front and Wellington streets. York county council has been in session here all week. The township councils will foregather in a few days. The city council will of course meet as usual Monday night. If any country needs money that country is not this country. And the most useful of these bodies are the un-constituted municipal legislatures. The last useful is the pretentious senate.

John Bright says colonial federation means the loss of Canada to the empire. It is certain that Mr. Bright knows all about it and that, consequently, Sir John A. Macdonald endorsed the idea when in London merely as the most direct and convenient road to Canadian independence. It was a poor return for the G. C. B., but then it is part of a political leader's stock in trade to obtain his object without exposing his hand.

Our reporter's interview with the merchants who are sufferers from Mr. Manning's fence in front of Jordan street will show that they do not blame him for the bad contractors. The do, however, look to the mayor to enforce the law and compel the removal of an obstruction which is serving no useful purpose nor can serve any for ten weeks yet. While Mr. Manning is waiting to hear from Antwerp he might circulate a petition to have the fence removed.

Remarkable Restoration.
—Mrs. Mary O'Brien of Buffalo, N.Y., was given up to die by her physicians, as incurable with consumption, it proved liver complaint, and was cured with Burdock Blood Bitters.

Catarrah—A New Treatment.
Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon treatment for catarrah. Out of 2000 patients treated during the past six months, fully ninety per cent. have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent. of the patients presenting themselves for cure have been cured at home, and the presentation of the year is the most remarkable permanent cure. The majority of cases being cured at one treatment, the majority of cases should correspond with Messrs. A. H. DIXON & SONS, 305 King Street West, Toronto, Canada, and enclose stamp for their treatment of catarrah—Medical Staff, 25 Road the following—

DEAR SIR,
My wife was afflicted with Catarrah for over fifteen years, the inside of the nose was badly eaten away with the disease. For the past five years it was almost impossible for her to breathe through her nostrils. For the last year she has constantly taken doctors' medicine without receiving any benefit, and finally we were told that the Catarrah had no cure but that there was no cure for her. We thought any hope we applied to you for your remedy and eight days after the first treatment she was able to breathe freely through her nostrils and the disease had entirely disappeared—but as you advised, she took a second treatment. It is now nearly four months since she used the remedy and she has no signs of Catarrah, and we consider it a permanent cure. Her general health, which was not good, is also improving through the use of your Blood Bitter. Wishing you every success, I remain faithfully yours,
SETH CLINE, Harrisville, Ont.

GENTLEMEN,
I feel it my duty to state to you the merits of your remedy for Catarrah. I had the obnoxious disease for the past four or five years and after the first treatment of your remedy I felt entirely a new man. Before I was cured I felt as if I had a hot coal in the head, but now I feel as if I had a cool coal in the head. If you feel that your remedy is worthy of the name of a cure, please send me a copy of your circular. I would be very glad to try your treatment. I believe that suffering humanity would be greatly diminished. Wishing you every success, I remain yours truly,
W. W. NOLAN,
Of Norton & Knight, Merchants,
Port Arthur, Ont.

"Well, you see he was acting as treasurer for the company, and when he left suddenly he took the largest part of a week's receipts."

A Wise Conclusion.
—If you have valiantly tried many remedies for rheumatism, it will be a wise conclusion to try Hagar's Yellow Oil. It cures all painful diseases when other remedies fail.

THE COMBAULT'S CAUSTIC BALSAM!

It is undoubtedly the most valuable and reliable Veterinary Remedy ever discovered. It has superseded the Actual Caustic of the past; produces more than four times the effect of a blister; takes the place of a U. Liniment, and is the safest application ever used, as it is impossible to produce a scar or bluish with it. It is a powerful, active, reliable and safe remedy that can be manipulated with the finger or the brush. Thousands of the best Veterinarians and Horsemen of this country testify to its many wonderful cures and its great practical value. It is also the most economical remedy in use, as one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any Liniment or spavin cure mixture ever made. Price \$1.50. Sold by druggists, or sent, charges paid by LAURENCE, W. D. COLLINS & CO., Sole Importers and Proprietors, 21 Front Street, West Toronto, Ont. None genuine without it has our signature on the label.

CHAPMAN, SYMONS & CO., BUTCHERS & PRYORS.
Dealers in Pure Country Milk in opposition to the Milk Ring of this City.

100 TICKETS FOR \$5.
Regular delivery or at store—no stop stuff—only the pure article. At whole sale very low.
