plation of be discouraged by the general apathy 40,000,000, had 43 low grade and 17 high which had hitherto prevailed so large-25,000,000; France, with a population of a population of the province is composed of men interested in farming, yet they do not pulation of about 44,000,000,had 49 schools; Austria, with a population of about 44,000,000,had 69 schools, besides a splendidly endowed college at Vienna; Germany has 170 colleges, many of whom not only taught agricultural implements; Norway and, Sweeden support three high class colleges and 27 of a lower grade to a population of six millons; Holland had not so many in proportion to other countries, only having three colleges say, would form the neuclus of such as the colleges and and not so many in proportion to other countries, only having three colleges say, would form the neuclus of such as the colleges and and not so many in proportion to other countries, only having three colleges say, would form the neuclus of such as the colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges say, would form the neuclus of such as the colleges and and not so many in proportion to other countries, only having three colleges say, would form the neuclus of such as the colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and and not so many in proportion to other countries, only having three colleges and all and see me. A fit guaranteed.

| All Defendence is all kinds, CLEANES of Re-Devision, was the best equipped agricultural country of Europe, having 100 colleges, with a central one at Copenhagen which was splendidly equipped; the colleges in that country gave certificates to their graduates which allowed them to teach students. Spain, Italy, Greece and even Russia, had at least one school to every \$000000 of the population. When he specified were the specific spec

Rossia, had at least one sandot of the population. When he came to compare these figures with the existing state of agricultural in Nova Scotia he was very much surprised to farmers—were yearly leaving home to find the backward state, in relation to seek work in other lands, seeing that find the backward state, in relation to seek work in other lands, seeing that agricultural matters the country really they never had been educated in a line was in. The United States land was of thought calculated to make them regrien freely by such colleges, and there were 83 technal colleges of applied in the art of husbandry was the one science. We were far behind Ontario thing needful. A course of general and even Quebec, which had three study, however high, would not answer small colleges in active operation, while the purpose contemplated.

Mr. Peter Jack remarked that, as FANCY GOODS! The grange was doing a good work in previous speakers had referred to the endeavoring to arouse public sympa emigration of the sons of farmers, per thy. The suggestion of Gen. Laurie, haps a partial solution of the question (as published in the Herald a few days of agricultural education might be solv ago), he thought a most lamentable ed by immigration—the immigration of one, because the professors in colleges some good Scotch farmers. He alludin Nova Scotia were already overwork ed to a correspondence with a friend of ed and were as a matter of fact doing his who was spending his holidays in the work of two or three men in col leges in other countries. For this rea-about the condition of the farmers. son he would oppose any proposal to Mr. J. replied, telling his friend of the

add to their work. He was in entire sympathy with the scheme for a college or the lower provinces.

Professor Lywson did not think he could give any idea of a curriculum for the lower provinces.

Professor Lywson did not think he could give any idea of a curriculum for the september of Nova Scotia, which might be purchased for less than the annual rent paid for these farms. His friend or the september of the property that the Government did not properly advertise country like this. There is a despite a september of Nova Scotia a and the country like this. There is a despite a september of Nova Scotia a septe a college in a country like this. There the advantages of Nova Scotia as an could be only one opinion as to the agricultural country. Mr. J. gave it as Bridgetown, N. S., May, 1886. n5tf desirability of a college, but it must be his opinion that it would pay the Gov. properly equipped and conducted, ernment to import first class farmers were numerous difficulties to be met them farms free on condition that they with and surmounted, such as had been encountered by the college at Guelph, according to the most advanced system of agriculture. It would be greatly to colleges was to get the boys to attend Ont. The great difficulty in starting of agriculture. It would be greatly to ENCOURAGE HOME MANUFACTURE. colleges was to get the object of the lectures. If a college was to be men could be induced to settle in the established in the lower provinces, let various agricultural centres of Nova it be done in a thorough manner and let none of the excuses interfere—let us have thorough courses of lectures teaching—the best way to make the and all the other etcetras. He most profitable use of their farms. quoted from a report of the college at OTHER SPEAKERS.

quoted from a report of the college at Guelph, pointing out the most valuable courses to be pureued and the subjects which would yield the most advantageous results. An agriculturist required to know what the soil of his farm consisted of; its extent and the cost of working it; what crops were best suited to it, and everything connected with his property. It was as necessary for a farmer to know the anatomy of an animal, as for a medical man to be acquainted with that of the human body, because it was requisite be should regulate their food, look after their nervous system, etc. Students their nervous system, etc. Students liament and two colleges. After a CHAIN PUMPS should be taught chemistry, botany, short address from the grand master, etc., because they were all necessary to the practical farmer. There would not the practical farmer. There would be enough students in Nova Scotia to How Ir Feels to Daown.—It is an Pumps Complete, 46 Windsor... 53 Hantsport. justify the establishment of a college, old theory that death by drowning is but if the three lower provinces united by no means painful. American says: 'Let any one who has rest of the Dominion combined, and an attack of the lock jaw take a small

Mr. J. W. Longley, M. P. P., said that his own county had been making steady advances in agricultural pursuits for a number of years past. The productiveness of the land had been largely increased of late. The industry had received a healthy impetus from the opening up of markets in Europe for their products. It was the chance of making good profits from the labor that stimulated the industry there as that stimulated the industry there as elsewhere. Yet he recognized the need of practical training, and, in his opinion, the Government should not with hold reasonable assistance.
