MISCELLANEOUS NOTES.

PIERIS RAPÆ, Linn.—In your "Miscellaneous Notes" of Nov. 15, your correspondent, T. L. Mead, of New York, speaks of having captured "a specimen of *P. rapæ* on flowers in a salt marsh on the New Jersey side of the

²A single specimen taken several years ago on the shore of the Lake, only lately identified.

³Dr. Le Conte, in his List, has placed *N. pygmæus*, Kirby, as a synonym of *N. mortuorum*, Fab., but, as Dr. Horn informs me, now considers them distinct. A fine specimen of the variety *crispetus*, Motsch, was taken here by Dr. Milward.
