"BUILT ON RIGHT LINES"

Every thoroughly practical man must agree that the above statement is only applicable to

KELSEY CORRUGATED WARM AIR GENERATORS (Pat'd)

Winnipeg, Man., May 16th, 1901.
The James Smart Mfg. Co., Brockville, Ont.
Gentlemen,—When erecting our School Board Office Building in the fall of 1900 your agents suggested we should use the "Kelsey" warm air generator. The Chairman of our Building Committee, Mr. John McKeelmea a thoroughly practical man, owner of the Vulcan Iron Works, and myself made a careful examination of the furnace and we agreed it was what we wanted. It was in use all last winter and we are satisfied. It is a good heater, having a large radiating surface, is free from gas or dust, sent heat into most distant part of the attic, and we had to provide a register opening into the basement in order to warm it sufficiently for use.
From a large experience in heating plants I have no hesitation in saying that "Kelsey" is built on right lines.
Yours truly,
J. B. MITCHELL,
Inspector of School Buildings and Supplies.

Over 1,600 KELSEYS in use in its home city, Syracuse, N. Y.

KELSEYS are being shown at the Pan-American Exposition. Send for PRINTED MATTER giving experience of satisfied users.
