

NEW C.P.R. VIADUCT

EPOCH MAKING IN BRIDGE ENGINEERING
DESCRIBED IN THE READING PAGES OF
SEPTEMBER ISSUE OF "CONSTRUCTION."

Burlington High Carbon Reinforcing Steel

was used exclusively in reinforcing the concrete for this work, which, because of the length of the individual spans, and the details of construction, is described by the Engineers as unprecedented in the engineering world.

Bars Bent to Shape for Beams, Stirrups, Etc.

Burlington Steel Company
Limited
