Export Contact: Mr. R.B. Bawden, President

Marketing Profile

Dover Corporation (Canada) Limited, Rotary Lift Division was founded in 1921 in Chatham, Ontario. The company is the North American leader in the automotive, truck and the transit lift industry.

The Chatham plant produces a complete line of in-ground and surface lifts. Rotary Lift provides customers with computer-aided-design (CAD) facility planning service to assist owners in dividing their work space into the most efficient layout. Rotary Lift has also taken the industry lead in tackling the most pressing problem of the decade and the next century -- the environment.

Rotary Lift has introduced an environmentally safe biodegradable hydraulic fluid RL1190 which was developed from a vegetable oil base and has qualities equal or superior to the common petroleum-based hydraulic fluid.

The Rotary Lift experience provides technical design, installation, and sales and service for all its manufactured lifts.

Products/Services Available for Export:

Automotive In-Ground and Surface Lifts
