

of exports, in reality some 30,000 tons were shipped from the Pilley's Island mine. Again, between 1865 and 1867 but  $38\frac{1}{2}$  tons of copper are returned as exported. I learn from other sources that in reality it amounted to 6,580 tons. There is no return at all for 1868, yet several large cargoes of copper were shipped during that year from Tilt Cove.
