### Wheat Stocks on March 1

Wheat stocks in the United States and Canada declined but slightly dur-ing February, says Bradstreet's, not because of a larger movement in or smaller exports from the United but because the movement of States, but because the movement of Manitoba wheat was so large as a re-sult in a record-breaking increase in Canadian stocks for this season of the year. The movement of wheat to in-terior United States markets in Febterior United States markets in February was really smaller than a year ago, and exports were only slightly these facts the decrease in February this year in United States and Canadian stocks was only shout 5.464,000 in February a year ago. As bearing on this, the fact might be noted that Manitoba and Western Ontario wheat this year. Following is the situation with the second of the control of the control of the state of the second stocks increased over 3,000,000 business this year. Following is the situation of American stocks on March 1 as compared with earlier periods of the present cereal year:
