Where and How Pickles Are Made-A Thriving and Interesting Industry.

CANADIAN

etc., some eighty thousand dollars' worth, and of pickles, sauces and catsups one hundred and nine thousand dollars' worth. be impossible. This is a fact which should by necessary to import the table delicates represented by these figures while Canada who may contemplate taking a hand in represented by these ngures many times of can and does produce almost everything of which they are made? In a number of supplying the Canadian demand for pickles, sauces, jellies and jams, which is now so articles The World has recently called atarticles The World has recently called at-tention to the failure of Canadian manu-facturers to fill this field as it might be and When The World's representative right should be done, and the other day Messrs. the Messrs. Lytle's establishment yester-T. A. Lytle & Co. of this city invited a re-day he was courteously shown over it by presentative of The World to visit their es the head of the firm, who explained the blishment on Richmond-street west and various processes and appliances. The first tablishment, on internation one concern at any rate see whether or not one concern at any rate is not doing its full duty in this line. Yes-terday this invitation was accepted, and posite the main premises. Here the vegethe representative of this paper was shown tables, etc., are received from the growers. over the estblishment, being not a little The first thing that met the eye was an stopished at the magnitude of the business ingenious machine or contrivance which which is evidently being done by the firm. sorts the vegetables into several sizes, The main building in which the business is thus saving considerable hand work, which carried on is at Nos. 124, 126 and 128 Rich- would otherwise be necessary. In this mond-street west, and is a handsome five- building were stationed no less than sixty storey structure, built and laid out with a large salting tanks, with a capacity of from view to the requirements of the business. one to three thousand gallons each. In The firm began the manufacture of vine- these the vegetables are placed in brine gars as far back as 1882, and commenced as they are received from the growers and the making of pickles in 1887. Their begin- kept till they are required in the pickling ning in the business of pickle manufactur- room proper. The uninitiated will be suring was a modest, unpretentious one, hav-ing been in a small cellar on Pearl-street, ing been in a small cellar on Pearl-street, ing was a motor, unleaded on Pearl-street, are kept in these tanks sometimes for up-with a little force of six employes. Now wards of a year perfectly fresh-or perfectthey have the largest concern of its kind in the Dominion, and, at their present rate hardly be fresh. Such, however, is the fact; of progress, bid fair, ere many years, to moreover, the long keeping in brine enrival in magnitude and importance the sures that crispness which pickle lovers in great pickle and sauce establishments of sist upon. Care is necessary during this the United States and Great Britain. The process, however, to keep the brine abof many difficulties and discouragements. ablest should become soft or clammy. Perhaps the greatest obstacle they have From these tanks the vegetables are conhad to overcome has been the prejudice in veyed on trucks to the main building and favor of imported goods. Manufacturers carried by an electric elevator to the picklin other lines have had this wrong-headed ing room, where they are placed in tanks predilection in favor of foreign made arti- freed from their surplus saltiness. They to contend with, but to the makers of are then taken to tables or trays when

TYPICAL

They cannot close their eyes to the fact that a very slight blunder on the part of the Canadian Commissioners, in negotiating the terms of a reciprocity treaty, might mean business ruin to them. As the tariff now stands it is fairly satisfactory as a measure of protection to manufacturers in their line, but any lowering of the wall in favor of United States rivals would be disastrous.

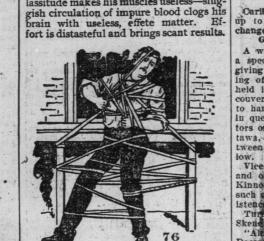

THREE YEARS FOR FORGERY. A. T. Burnett Was Crooked When Doing Business for Michael Winters of York Township.

In the County Judge's weekly Criminal tenced by Judge McDougall to three years discharge of a mortgage. Louis Sullivan and P. G. Beatty were convicted of stealing a quantity of copper wire from the Metropolitan Street Railway

Company. Sullvan got three months in the Central Prison to run concurrently with a four months' sentence which he is Charles Dafoe was found guilty of stealing a buggy from Fred Jack of Mount Albert. As there are other charges against him, to be tried at the December Sess'ons, he was not sentenced.

The temptation to avoid the difficulty by adopting the names and imitating the labels and styles of popular foreign made articles, and thus passing their goods off as "Imported," has been great-too great for some makers to resist-and merchants have, for the profit they found in it. winked at and assisted in the deception, salving their consciences, perhaps, with the reflection that, after all, their customers were getting as good an article as they

were getting as good an article as due, thought they were buying. The Messrs. Lytle have steadily and consistently re-fused to adopt this plan. They determined that their goods should be at least equal in quality to any imported articles of their kind, and that the standard once estab-lished, should never be lowered. They then adopted their own names and labels, put up their goods in neat and attractive pack-ages, and left them to win their way to popular favor by their own intrinsite'excell-ence and merit, belleving that a business thus established would have the all-important to have demonstrated the wisdom of the plan they adopted, and their brands "Sterl-

eczema in its worst form."
"I must acquaint you with my first knowledge of your medicine," writes T. J. Frampton, Esq., of 412 Dayton Avenue, Dayton, Ky. "I am a boatman by pro-fession, plying between Cincinnati, Ohio, Memphis, Tenn., and New Orleans, La. There was a man of my acquaintance at one of our regular stopping places who represaid it for consolation to him, as I never expected to see him alive again. While he was waiting for death to come (as he had resigned himself to his supposed fate) a drummer from the East happened to come to one of the stores in the little town. He heard some men in the store talking about this man they were expecting to die. This drummer after selling a bill of goods to the merchant, went to see the sick man, and he recommended Dr. Pierce's Golden Medical Discovery. I think it was twelve bottles that the patient took altogether, but he told me he took two or three bottles after he appeared to be entirely well. He was over-joyed with the 'Discovery.' Now this was more than fourteen years ago, and he has enjoyed good health ever since, without any return of the disease, for I suppose I the grosser product of Southern and West

any return of the disease, for I suppose I have asked him a dozen times about it. I know it returns in many instances, but his Was a permanent cure,"

The trouble usually starts with the diges-tion. Too much brain work takes needed blood from stomach to head and retards The body is not

fed. The nerves rebel. Sleep becomes a stranger. Loss of appetite is followed by loss of flesh—and all for the want of the right medicine at the right time. Dr. Pierce's Golden Medical Discovery is for the man who is losing flesh and vitality. It is for the man whose digestion needs help and whose nerves and brain are overworked. It is the greatest of all the very great cost of drilling by hand, in the extremely hard rock of the mine, de-c'ded the board to proceed at once with the construction of the dam, fine and power-house, and to advertise for tenders for air compressors, turbine, and other machinery. Mr. W. M. MacKinnon, C.E., was called in as consulting hydraulle en gineer pro tem., and during March the contract to Mr. R. H. Woods for 'dam, flux., etc., was awarded in the first in stant.' in October, 1897. confirmed and is-sued. On April 7, tenders were accepted from the William Hamilton Manufactur the property is most promising, and that the work of development will be continued throughout the winter. Work is being pushthe very great cost of drilling by hand, in farther, before drifting to any extent is undertaken. A camp is now being built, from the William Hamilton Manufacturing Company for a Rand drill, compressor plant and turbine wheel, all of which were where the men will board .- Border Budget.
