ROOSEVELT ON NATURAL RESOURCES.

Very instructive in every way for Canada, is the conference of governors of states and captains of industry that met on Wednesday in the White House at Washington to deliberate upon the conservation of the natural resources of the country. The conference was recommended originally by the inland waterways convention and President Roosevelt later invited the state governors to attend, declaring at the same time that there was no other question now before the nation of equal gravity as that which they were asked to consider. In response over five hundred distinguished citizens attended and the conference opened in a way that sufficed to show the importance attaching to the subject and the result to be reached. For the conference is, as the president put it, in effect a meeting of the representatives of all the people of the United States.

In his opening address Mr. Roosevelt touched lightly on the earlier history of the United States and its later rapid development. This has created a steadily increasing drain on these natural resources which, he said, are the final basis of national power and perpetuity which it is ominously evident are in the course of rapid exhaustion. The nation, he continued, began with the belief that its landed possessions were illimitable and capable of supplying all the people to make it their home. Now there is little land unoccupied, save what can be reclaimed by irrigation and drainage. "We began," the president declared, "with an unapproached heritage of forests, more than half of the timber is gone. We began with coal fields more extensive than those of any other nation and with iron ores regarded as inexhaustible, and many experts now declare that the end of both iron and coal is in sight."

The president divided the natural resources of a country into two sharply distinguished classes: accordingly as they are or are not capable of renewal. Coal, oil, gas, iron and other metals cannot renew themselves and all that can be done is to try and see that they are rightly used. But the soil, the forests and the waters and waterways cannot only be used in a way that will leave them undiminished for the succeeding generations but can actually be improved by wise use. There is, the president urged, a duty to posterity in securing that the country's renewable resources instead of being impaired are improved. "No wise user of a farm," he remarked, "exhausts its fertility. So with the forests. We are on the verge of a timber famine in this country and it is unpardonable for the nation or the states to permit any further cutting of our timber, save in accordance with a system which will provide that the next generation shall see the timber increased instead of diminished." And he concluded by an eloquent exposition of the duty of the nation and the right of the nation to guard its own future in the essential matter of natural resources. In the course he said:

"In the past we have admitted the right of the individual to interfere with the future of the republic for his own present profit. The time has come for a change. As a people we have the right and the duty, second to none other but the right and duty of obeying the moral law, of requiring and doing justice to protect ourselves and our children against the wasteful development of our natural resources, whether that waste is caused by the actual destruction of such resources or by making them impossible of development hereafter."

The reason for this conference, the conference itself and the address of the President of the United States are full of instruction and warning for Canada, standing as she does in the matter of population practically where the United States stood a hundred years ago. But the problem Canada has to face was not in existence a hundred years ago. The natural resources of the Dominion have already been exploited to an alarming extent by capitalists, home and foreign, to an extent far in excess of the needs and demands of Canadians themselves. Vast and valuable mineral areas, forest areas, land areas and water powers have been handed out and are still being handed out without any heed being taken to the manner of their use and whether it is wise and properly conserves the present interests of the country and the rights of future generations of the people. And while Canada's public domains are being wasted and imperiled, governments and legislatures are spending most of their time wrangling over schemes devised by partisans to sustain themselves in power, instead of setting themselves assiduously to the wise and efficient administration and conservation of our great natural resources and the promotion of national efficiency.

AN INDEPENDENT VICTORY.

Governor Hughes of New York has drawn first blood in his contest with the Republican bosses in the state. On Tuesday his candidate, William C.

Wallace, was elected senator from the 47th district by a majority of 248 votes. The majority is less than that of the late Republican senator in the election of 1906, but both parties showed a largely diminished poll, owing to the abstention of the farmers who would not sacrifice their plowing, and on the Republican side to the hostility of the party machine whose members openly boasted in advance that the result would show whether the "appeal to the people is a good substitute for the work of the politician." In these circumstances a Democratic victory was generally expected and as this would have meant the defeat of the governor it would have been also acclaimed as certain evidence a high moral issue could not avail when "practical methods" are lacking.

The governor fought his battle single handed, relying only on the goodness of his cause and the confidence of the people gained by his unswerving devotion to his public duty. No money was forthcoming for even the legitimate expenses of an electoral contest and the full benefit of their organization. Their failure to poll within 4000 of the votes cast for their candidate in 1906 is more remarkable than the similar falling off in the Republican poll. The latter is not surprising, looking to the attitude of the "practical politicians," but the former, apart from causes common to both parties, can only be accounted for by the sympathy many of the rank and file of the Democrats feel towards the governor's policy, a sympathy which made itself apparent not alone in abstention, but in active support.

However much they may openly attempt to minimize the significance of the election, the Republican bosses fully realize what it means. Governor Hughes has been publicly charged with destroying the party organization in New York State and before the election one of his senatorial opponents declared that for them "it is a question of self preservation, and my idea is that we ought to destroy Hughes." But Hughes will not be destroyed, nor will any public man who is capable of rousing and retaining public confidence. "Trust the people and they will trust you," is a far stronger foundation on which to build than is a party machine controlled by men out not to trust but to delude the people. Governor Hughes has deeply impressed an election of his state that in him they have a chief executive dominated by the highest standard of public life, determined to do his duty by those who gave him his elected position and resolute to carry thru whatever policies are for the common good. That is why, without organization and without money, he has gained a supporter in the senate. And that is why the machine politicians in his party quake at the thought of his accepting renomination.

CHINA'S ANTI-OPUM CRUSADE.
Evidence is accumulating that China has entered upon a genuine movement towards moral reform so far as the use of opium is concerned. Its strength has been acknowledged by the decision of the municipality of Shanghai to close the opium dens within its jurisdiction. Higher restrictions measures have been refused by the residents as they desired to be satisfied that the Chinese authorities were in earnest in their crusade.

Nearly two years have elapsed since the edicts against opium were published throughout the Chinese Empire and considerable doubt was expressed by those acquainted with the country and its people both as to their motive and probable effect. Last February, however, a report by the British minister at Peking was issued of a distinctively favorable character and this view has been recently confirmed by an enquiry instituted by the Chinese Recorder and addressed to all missionaries stationed in China.

As was only to be expected the replies disclose considerable variations in the execution of the imperial decrees, depending as it does on the vigor and zeal of the officials and the nature of popular opinion. The edicts are reported to have been posted over the greater part of the empire, and the closing of the opium dens has been effectively carried out in many provinces. Among the rising generations too there is a growing sentiment against the drug.

For the future the outlook is even more hopeful. Opposition to the opium habit is strongest in the new army and police, in the new schools and colleges, among students and the cultured part of the population, and in the press. That the movement has done much to weaken the power of the opium traffickers is at hand. The reforming spirit has an appetite that grows with what it feeds on and momentous consequences to the world may lie in the anti-opium action of the government.

CONFLICT OF AUTHORITY.

Editor World: The director of the People's Sunday Night Services, which will close for the season Sunday night, May 24, has no objection to the edict of the police commissioners requiring all churches and missions to take in their bulletin boards, especially in the case of churches, the church or place of meeting. Whatever may be said in favor of a bulletin board near the church announcing the services for Sunday (like that of Elm Street Methodist Church at the corner of Elm and Yonge streets, the bulletin board has been there for years and did not disturb traffic) there can be no defence put forward for boards half a mile and in some cases a mile away from the

place of service, especially if that service be held in a theatre or hall.

Having conceded that much, positively object to the officiousness of the chief inspector in issuing summonses against the director of these services and requiring his presence in the police court when he knew that Mr. Rust, the city engineer, had given him a permit to place the bulletin board announcing the services until May 24 at the corner of Yonge and Shuter streets. Very wisely and judiciously did Magistrate Kingsford dismiss the case when he read the permit, and the Mr. Know-it-all (the chief inspector) tried to explain the magistrate with a wave of the hand refused to listen and said, "Mr. W., the case is dismissed."

The director appreciates the courtesy of Magistrate Kingsford in promptly dismissing the case and refusing to listen to the chief, but he has been advised to air the matter in the courts. (a) Had the chief inspector a right to issue the summons, signing or having his deputy sign G. T. Denison's name to it, and requiring the presence of the director of these services in the police court when he knew the city engineer had issued the permit?

(b) If not, is it not a case of criminal arrest? (c) Has the city engineer no right to issue a permit to have the board remain there for two weeks when it was not obstructing traffic and no one made complaint? A few weeks ago the city was glad to use the board to cover a great hole in the road made by the bursting of a water main. It was not in the middle of the street "filling a gap" and no doubt saved the city hundreds of dollars for claims for broken horse legs. As soon as the rain is fixed this methodical staff inspector issues a summons to a missionary, a Methodist, or a Baptist, and the board is taken down. It is not half as complimentary as some of the things said about him at the city hall.

(d) Who rules this model city of ours? Has the council no authority? Has the city engineer no voice? This permit was issued by the city engineer.

I ask for information. What right has a police officer, who is but a servant of the people, to interfere with the action of the city's official? Is not the city bound by the action of its engineer? On law versus morality, the director advises the director to put the board back and make it a test case. It would cause a little excitement in this quiet town during these quiet elections and give the defendant a little cheap notoriety. He would be willing to do it and save the city a great deal of money on the mind of the chief inspector what all the city officials say that he "does not run this city." We desire to be "subject to the powers that be," but who are the powers?

Toronto, May 14, 1908. M. Wilkinson.

CHILD'S SEVERE BURNS.

Healed by Zam-Buk.
The little girl of Mrs. Lewis Best of Carleton Place, Ont., who lost the stove and burned her forehead very badly, Mrs. Best says: "The burn was about the size of a fifty cent piece and was near the eye. It made my little girl's eye swell till it almost shut, and then she got cold in it. It began to matter very badly, and I could not stop it, although I bathed it good every night and morning. At last I sent for some Zam-Buk which soon healed the burn. It made my little girl's eye swell till it almost shut, and then she got cold in it. It began to matter very badly, and I could not stop it, although I bathed it good every night and morning. At last I sent for some Zam-Buk which soon healed the burn. It made my little girl's eye swell till it almost shut, and then she got cold in it. It began to matter very badly, and I could not stop it, although I bathed it good every night and morning. At last I sent for some Zam-Buk which soon healed the burn."

WOOD PULP INVESTIGATION.

Telegram Read From Manager of Canadian Mill.

WASHINGTON, May 14.—When the wood pulp and print paper investigating committee of the house met to-day John Norris, the representative of the American Newspaper Publishers' Association, placed in evidence a telegram from George Calhoun, Jr., general manager of the Laurentide Paper Mill of Canada, and a letter from Carl Riordan, general manager of the Riordan Paper Mills of Ontario, showing that the labor per ton of production is high in the Canadian mills as in the United States mills, and in some instances higher, according to Mr. Riordan.

Mr. Norris submitted a copy of a letter which was yesterday sent out by the American Newspaper Publishers' Association, to \$1000 publication in addition to a telegram to 1300 newspapers, urging a full and prompt reply by newspaper to the printed questions forwarded them by the committee. The telegrams were sent on Tuesday and the letters yesterday.

A Canine Scap.

Yesterday afternoon Bay Street, near Adelaide, was the scene of a lively scrap between two well-bred bulldogs. One, a solid bulldog, was going north and the other, a brindle and white, was going south. The brindle got the first hold and had the better of the argument for a short time, but the solid dog was more clever and soon had his adversary in distress. It was with considerable difficulty that the furious animals were separated, as, although a crowd of fully 200 people had gathered to the spot, no one seemed anxious to take the chance of breaking their hold. The brindle, said to be connected with the Kelvin stable, received decidedly the worst of the milling.

A Great New University.

NEW YORK, May 14.—Thousands of graduates of the College of the City of New York came back to their alma mater to-day to join with distinguished public men and educators in dedicating the handsome new college buildings on Washington Heights. The buildings were erected at a cost of nearly \$7,000,000 and the work of construction required nearly five years.

Donlands Maple Syrup. Only eighty odd bottles left. At Michie's. ed7

It is Wise to be forewarned for the happenings of the day by fortifying yourself with a knowledge of what is going on. This is easily accomplished by reading The Toronto Daily World, delivered before breakfast. Telephone orders received at Main 5.

AT OSGOOD HALL.

ANNOUNCEMENTS FOR TO-DAY.

Master's Chambers.
Cartwright, master, at 11 a.m.
Judges' Chambers.
The Hon. Mr. Justice Teetzel at 10 a.m.

Divisional Court.
Peremptory list for 11 a.m.:
1. Re Sinclair.
2. Methodist Church v. Welland.
3. Woods v. Plummer.
4. Stewart v. Stratford.
5. Toronto v. Ward.

Court of Appeal.
Peremptory list for 11 a.m.:
1. Edde & Lynn v. Canada Foundry Co. (continued).
2. Fitzgerald v. Barbour.
3. Jacobs v. Beaver Silver Cobalt Mining Co.
4. Berlin & Waterloo Railway Co. v. Berlin.

Toronto Non-Jury Sittings.
Peremptory list for Monday at 11 a.m.:
1. Fitzpatrick v. New Liskeard.
2. Batts v. Cherry.
3. Grip v. Thompson.
4. Joyce & Bull v. Smithstone.
5. Boswell v. Scott.
6. Rockingham v. Cartwright.

Dead in Dispute.
To have a certain deed to lands in Port Hope set aside, the Imperial Bank of Canada has issued a writ against George Gibson and F. Outram.

Claiming Money for Horse.
Alexander M. Blais of Montreal has been made defendant in an action brought by Andrew Devine to recover \$470.75 alleged to be due for a horse.

Protested Note.
A promissory note for \$1000 which has been protested is now the subject of an action brought by J. C. Cook of Marmora against B. H. McAllister, E. J. Cowan and John W. Cook.

Suing for Damages.
Ferdinando Mammoliti was injured in an accident at the works of the Page-Hervey Iron Tube and Lead Co. at Guelph. Mammoliti claims it happened thru the negligence of the company's servants and he is now suing them for damages.

Bank's Application Refused.
The Dominion Bank has an action pending against Joseph A. McCracken and other in which Henry Cooper was a defendant. Cooper having died since the writ was issued, the bank moved before G. S. Holmsted, sitting for the master-in-chambers, for an order striking out Cooper's name from the action. Judgment was now given refusing the bank's application.

Secret Formulae.
Newton H. Brown has made a claim against J. A. Carver & Co., Limited, of Toronto, for damages for breach of contract, and for \$1462.12 for goods sold and delivered. An injunction is also asked to restrain the defendants from manufacturing certain goods according to the secret formulae of the plaintiff.

Wants to Seize the Lands.
George J. Foy, Limited, has begun an action against Mary Ann Roddy and Patrick Roddy of Bancroft for a declaration of the court that certain lands in Hastings County are exigible under execution.

Extradition for Bribery.
Chief Justice Falconbridge granted an order for the issue of a writ of habeas corpus directed to the gaoler at Hamilton to produce Nelson Cannon on a charge of bribery. Cannon was remanded to jail in Hamilton for 15 days pending extradition proceedings to have him arrested before G. S. Holmsted, sitting for the master-in-chambers, for an order striking out Cooper's name from the action. Judgment was now given refusing the bank's application.

DR. BELL'S FLYING MACHINE
Report of Its Successful Flight Was Premature.

BLMIRA, N. Y., May 14.—A special to the Star-Gazette, from Hammondsport to-day, says:

Showers which had softened the track yesterday prevented the intended flight of Professor Alexander Graham Bell's aeroplane, "heavier-than-air" flying machine, in which the United States government is interested, and which was prematurely was reported successful.

The machine, "White Wings," is equipped with a 30 horse power motor, and great sails which spread between 40 and 50 feet in form and equipment it is not unlike the "Red Wings" machine with which Prof. Bell had considerable success.

Until such time as the White Wings makes a successful flight, which the inventor confidently hopes will not be long distant, he will not discuss publicly the smaller details of the mechanism.

Lieut. Selfridge of the United States signal corps is here, detailed by the government to watch the progress of the experiments and report the feasibility of utilizing the aeroplane in warfare. Within the next few days it is expected Prof. Bell will attempt a flight with his new machine.

President Roosevelt Accepts.
WASHINGTON, May 14.—President Roosevelt has accepted the presidency of the international conference on tuberculosis, which will be held in the city in the autumn.

Fatal Tentative Fire.
PASSAIC, N.J., May 14.—An incendiary fire in a tenement in Monroeville, occupied by 15 families, to-day caused the death of three children and probably fatal injuries to two women.

OBITUARY
At Watertown, N.Y.—H. L. Mills, lake captain, suddenly, aged 48.

At Winnipeg—Mrs. A. C. Bannatyne, widow of one of the historic pioneers of the Red River, who was a member of the first Manitoba Government.

At Halifax—Lady Johana, wife of the late Sir Malachi Daly, ex-Lieutenant-governor of Nova Scotia. One of her sisters, Madame Kenny, is in the convent of the Sacred Heart, Montreal.

At Washington, D.C.—Rear-Admiral Charles W. Ray, engineer-in-chief of the navy and chief of the bureau of steam navigation of the navy department.

At Brookville: John Grant of Abbott, Grant & Co., manufacturers. He is survived by a family of five daughters and two sons.

At Windsor: Thomas A. Dow of Dow & Co., brewers.

At Windsor: Mrs. Jane Taylor, aged 79; Mrs. Elizabeth Fox, aged 88.

Week-End Trips.
After your week's work and worry in office there is nothing more refreshing to both mind and body than a little pleasure trip. In consideration of this, the Grand Trunk Railway System have made arrangements to issue return tickets to a great many points in Ontario at single fare with ten cents added, going Saturday or Sunday, returning any train Monday. Full information at City Office, northwest corner King and Yonge.
