DAYLIGHT SAVING

Senate and the house." New York state for two years has had a Daylight Saving and, Mr. Marks said, an amendment will law and, Mr. Marks said, any effort to repeal it would be hopeless. without the help of legislators from New York and Buffalo, most of whom have been found in favor of the law. The months for two campaign for the adoption of Daylight Saving is to be continued in the United States. The action of congress in repealing the measure passed two years ago, has shown the necessity of popular education on the benefits of summer time. Already surveys by Chambers of Commerce and industrial organizations are in progress in sixteen states to ascertain public sentiment regarding a continuation of daylight saving, and the campaign will be extended throughout the country before next April, according to Mareus M. Marks, president of the law. The months for two years had a Daylight Saving adapted an amendment will introduced changing the time from functioned changing the time from time changing in the time time, Marks said, an amendment will law and an amendment will alw and, Mr. Marks said, an amendment will alw and an amendment will alw and, Mr. Marks said, an amendment will alw and, Mr. Marks sund an amendment will alw the eastern time zone, but so many cities and towns elsewhere have registered such an emphatic protest against the repeal that we are including the entire country in our movement."

It is quite likely therefore that Day

It is quite likely, therefore, that Daylight Saving will be widely adopted by local and state authorities during the coming season apart from federal action. Similar action will probably be taken in Canada and, if the summer time period did not exceed four months as is iod did not exceed four months, as is now proposed in the United States, much of the hostility to it would be disarmed, and the advantages of Daylight Saving would make a wider popular appeal.
