GUM TENDERNESS

—A TOOTH-MENACE

It is true that four out of five people over forty suffer from gum-shrinkage, or pyorrhea (Riggs' Disease). But many people even under thirty have pyorrhea. Women, particularly after the baby comes, are peculiarly subject to pyorrhea. At such time they cannot be too careful about their teeth.

Pyorrhea commences with tender gums, or with gum-bleeding, at tooth-brush time. Gradually the gums become spongy. They inflame and then shrink. The teeth become exposed to decay at the base and tiny openings in the gums become the breeding places of disease germs which infect the joints—or tonsils—cause other ailments.

Beware of that first gum tenderness! Try Forhan's for the gums. It positively prevents pyorrhea, if used in time and used consistently. No ordinary tooth paste will do this.

And Forhan's cleans teeth scientifically as well. Brush your teeth with it. It keeps the teeth white and healthy.

If gum-shrinkage has already set in, start using Forhan's and consult a dentist immediately for special treatment. 30c and 60c tubes. All druggists.

How You Can Quickly Remove Hairy Growths

(Aids to Beauty.)

A well known beauty specialist advises this treatment for the removal of hair from the face. Mix into a paste some powdered deodorant and water, apply to hairy surface and after about 2 minutes rub off, wash the skin and every trace of hair has vanished. This method is quick and entirely safe. To avoid disappointment, however, it is well to make certain you get genuine deodorant.
