New York, Jan. 10.—There are excellent reasons for saying that financial interests with certain "Southers sources" of information are getting real data on international affairs. Their hints are receiving an unusua amount of attention in professional quarters. Peace is much nearer that superficial indications suggest, according to reports claimed to have been received by some important market operators who intimate tha internal troubles in Germany are fairnown to the superficial indication of the consorbip has any knowledge of. The censorbip has any knowledge of. The censorbip has effectually concealed, but has not suppressed the agitation, it is said. "Here is the reason for discrimination in favor of the stocks of individual companies which will be allowed to receive coal." says an active market source in commenting on the prospective curtailment of coal for non-essential industries. Despite olg recoveries stocks in a large number of cases are still far below intrinsic values according to good sources which are recommending purchases of metal and good rails on all recessions. Scale down buying orders are noted in some quarters in these stocks."—U. S. Rdg., S. P., Harvester and Mar. Pfd.

#### THE CORN MARKET BULL TRADERS MAY **SOMEWHAT EASIER**

Strength on Limited Export

Chicago, Jan. 10.—Prospects of a more plentiful distribution of cars in the west had a tendency today to ease down the corn market. The outlook however, for more snow and colder weather likely to hamper efficiency of transportation acted as nearly an offset. Business lacked volume. Opening prices, which ranged from the same as yesterday's finish to 1-8 cent lower with January 1.27 3-8 and May 1.25 3-8 to 1.25 1-2, were followed by a slight decline.

Oats displayed a little independent strength. Export demand, although having no great extent, appeared to furnish the stimulus.

New York, Jan. 10.—A continuance of the built trading tactics is expected in the market which seems to be gesting the latest German camouflage thrown around the entente peace details.

"The market needs some new news to put it higher." is the remark heard frequently in brokerage offices. A sentiment that seems to be spreading and inducing some short sales for terms.
