# N. & A. M. GRAHAM

Our reputation for fair dealing and reliable goods, coupled with the De Laval record of service and durability, has made the De Laval Cream Separator the leader in this community.

THE creameryman knows which separator skims cleanest, costs the least to keep in good working order, and lasts the longest. He has to know. The wrong separator might easily mean a loss to him of several thousand dollars a year.

They can't fool the creameryman That's why 98% of all the separators used in the world's creameries and milk plants are De Lavals.

And it's just as important to you as it is to the creameryman that you make no mistake in your choice

THE FOOD EXPORT OUTLOOK

The chief factor in deciding whether food prices in the United States and Canada will go up or down is the extent of the European demand. If Britain and the Continental nations will not, or cannot, take the accumulated food surplus in the United States and Canada, the great interests that have been accumulating stocks of food against the peace opening of Europe's

#### IS ICE-COLD WATER BAD FOR RHEUMATISM?

A BRITISH SEAMAN'S EXPERIENCE

This story of Wm. Rogers, a seaman in the Mine Sweeping Branch of the Royal Navy, is absolutely true and can be readily verified.

At Niagara Camp, in 1914, Rogers contracted theumatism. He was sent to the Toronto General Hospital, where for over 19 menths he was a patient, finally being discharged as incurable. In despair he took a friends advice and tried Templeton's Rheumatic Capsulos. The results were astounding—in a short time he was able to pass the stiff examination set by the Navy, and became an A.B. in the Mine Sweeping Branch.

For 17½ months he did service in the North Sea. On three occasions he was blown into the sea and remained in the ice-cold water as long as eleven hours at a stretch. Despite these hardships Rogers had no return of his previous trouble. Think about it. If TR.C.'S did so much for Rogers—will they not do the same for you?
