People and Places

Ontario Railway Mileage.

ONTARIO'S railway mileage totals 9,017.94. During 1910 there were completed and opened for traffic, according to the report of the Public Works Department, just issued, 357.52 miles of railway. Of the 757.95 miles of the Transcontinental across Ontario, all of which have been located, 531 miles have been graded and 333 miles of tracks laid. On the Algoma Central and Hudson Bay Railway 98 miles are under construction.

Prior to Confederation the railway mileage in Ontario totalled 1,447.5 miles. Since then 7,507.44 miles have been completed. There are now 703.77 miles under construction. The total electric railway mileage is 721.73. There are under construction 67.5 miles.

The Health of Montreal.

THE Montreal Star has been taking a fling at the health situation in the metropolis. The terrible infant mortality in Montreal during the heat wave is fresh in the minds of the public.

The Montreal death rate is very high. In the last six years the average is 22.64 per thousand of the population.

Improvements in the water supply are under way for the relief of typhoid. But typhoid is only one ailment of the suffering Montreal public. The white plague is eating its dirty way into the homes of the people. Tuberculosis deaths have increased from 919 to 1,336 in the past four years.

A Mammoth Dock.

HON. DR. PUGSLEY says the British firm of Morton Griffiths & Company will build the St. John drydock, which will cost \$4,000,000, and which will be one of the mammoth docks of its kind in the world. Norton Griffiths is the lowest tenderer. He is an English member of Parliament, who has visited Canada several times. His firm have large contracts in both hemispheres.

The School Lands Map

REAL estate agents and their clients ought to have a copy of the School Lands Map of Manitoba, Saskatchewan, and Alberta, just issued by the Department of the Interior. School lands are sections 11 and 29 in every surveyed township in the three above mentioned provinces. They are put on the market at auction every little while to help swell provincial education funds. Quarter sections are offered. Sometimes the land is leased for coal mining and haying and grazing, but never for agricultural purposes.

Men Who Won't Work.

THE claim is made in many Canadian cities that there are a certain class of men out of work who don't really want to get anything to do.

The Hamilton Herald a few days ago had occasion to find what truth there is in that claim so far as the Ambitious City is concerned.

It isn't because he can't get work that a man is idle these days, said The Herald in its issue of September 13. Gore Park and City Hall corner have the usual number of the old guard on the job these fall days, and the inference to be drawn from this occupation of outdoor seats in cold weather is that a man goes to such a public spot to find work. Yesterday a Herald employee was sent out to get a man to help him in unloading a lot of paper at The Herald warehouse. He went to Gore Park and the City Hall, where he offered 25 cents an hour for a whole day of easy work. There were no takers. Those who held down the seats

Do you find it hard to get good help?

Here is the kitchen helper that lessens work.

Makes it easier to get meals ready.

Saves countless, needless steps.

Keeps kitchens tidier.

Banishes lots of kitchen bothers.

Hanover, Ontario

Twice-as-quick circulation with less fuel

BECAUSE the fire-pot, the area of the grates, exposed surfaces in the combustion chamber, and the water

contained in the water wall, are all scientifically proportioned in the King Boiler, they ensure a quick circulation with a minimum of fuel.

KING BOILER & RADIATORS

To illustrate: Take two tea kettles, one holding a quart and the other two quarts, fill them full of water, and set them over the fire, it is quite obvious that the kettle holding the lesser quantity will come to the boiling point much faster than the other. The same principle applies to the King water wall when compared with that ordinarily used. The water wall in a King Boiler is 1 inch wide as compared with 1 1/2 inches of the ordinary boiler. The result in heating is obvious.

"Comfortable Homes" talks practical common sense on the heating question.
