

The future in your grasp

At IBM, innovation, such as this densely packed memory chip, is a widespread process. If you're looking for challenging work, professional growth and opportunity for advancement, you'll find them at IBM.

At IBM the key to innovation is people. Individual men and women with the opportunity to search for new and better ways of doing things and to be recognized for their accomplishments.

You may be involved in any one of a number of areas — sales, manufacturing, field service, engineering, systems analysis, administration, research, finance and many more.

You could be part of our team at IBM, innovating in the 80's — and beyond. Your next step is to contact the local IBM office or campus placement office ... we're interested in your future.
