

Summer Hill Herd

HEADQUARTERS FOR THE IDEAL BACON HOG.

The largest herd of pedigreed Yorkshires of the large English type in Canada. Purity of breed, size, and general excellence is my motto. One hundred awards with one hundred and five exhibits at 7 shows in 1899. A choice selection of young boars and sows of all ages for sale; also boars fit for service, and pregnant sows. Fifty breeding sows, of which 25 (twenty-five) are imported; also three imported stock boars bred by such noted breeders as Sanders Spencer and Philo L. Mills. Am also using two Canadian-bred stock boars, first prize at Toronto in 1898-99. Express charges prepaid. All stock carefully shipped and guaranteed as described. Telephone, Millgrove, Ont. Telegraph 254 Bay St. S., Hamilton, Ont.

THE NEW CENTURY ALPHA

BABY Cream Separators

Have never been beaten!

AN EVERYDAY STAND-BY.

SEE HOW IT TURNS UP.

SHELBURNE, JUNE 18, 1900.

The Canadian Dairy Supply Co., Montreal:
 GENTLEMEN.—I have bought a No. 2 Alpha Separator from your agent, Mr. Hugh Taylor, of Shelburne, Ont. It is now working four months, and I am pleased to give you this testimonial.

Last March I got a DeLaval on trial, which was satisfactory. Just then the Melotte agents from Dundalk got me to try a No. 1 Melotte separator, saying it would "beat the DeLaval, as it had done often before." But it came far from giving the results which they claimed for it. My barn is about 8 rods from the house, and the weather being very cold at the time, I found the Melotte separator would clog at times as the milk was a little chilled. The agents then brought a No. 2 Melotte, which gave the same results. I found that the discs in the Melotte separator would start and clog, commencing at the bottom and continuing upwards the longer you skimmed. As a result of the trial, I bought a DeLaval, and would advise my fellow farmers to try a DeLaval Separator before buying any other, as it is a machine that is well constructed, and will skim milk at any temperature and not clog.

Yours truly, SILAS MYERS.

ENSILAGE CUTTER B. 6

With Slow-Speed Pneumatic Elevator (Blower).

This machine is the result of years of experiment and work upon Corn Cutters and Blowers. Most of the Blowers upon the market have given only partial satisfaction, and that only under specially favorable conditions, and even now they are far from being a success. In order to produce "wind" enough they have to run at a speed that is dangerous, and that racks the machine and elevates it out very fast. The B. 6 machine will cut and elevate from five to ten tons of corn per hour while running 500 revolutions per minute. No other Cutter and Blower will do this. Have a suspicion of Blower Cutters that require high speed; they are apt to become ugly and kill a man or two while throwing themselves into the air and the surrounding country in pieces.

"The B. 6 Cutter arrived and our customer is highly delighted with the way the machine works. The machine is a 'Daisy.'" CUMSFORD & McELEN, South Woodlee, Jan. 15th, 1900.

"I received my note all right, and like my cutting box (B. 6) fine. I cut quite a lot of corn, and it works splendidly. I have cut straw nearly all winter, and my customers like it well." JOHN SIMPSON, Mooresville, March 12th, 1900.
