

# Get Your Roofs Shingled Right It's Less Money And Less Work

You can put on a roof that will last a hundred years and be the right kind of a roof every minute. Or you can put on a ten-year roof that will probably leak after the first rain hits it, and keep leaking till it is rotted away.

Either roof will cost you about the same in money at the start. But the "Oshawa"-shingled roof will be FIRE-PROOF—literally; and wind-proof—actually; and lightning-proof—positively. That's the hundred-year roof! And that "Oshawa"-shingled roof will be weather-proof for a century. We'll GUARANTEE in every way for a quarter-century—from now till Nineteen-Thirty-Two.

Guaranteed in writing for 25 years—and you needn't ever paint it, even! That's saying something, isn't it?

What would your mill-man say if you asked him to guarantee cedar shingles for even ten years? He certainly would make remarks!

And even the best cedar-shingled roof will be leaking badly inside of ten years. Seven out of ten of them leak the first time it rains. No wood-shingled roof is fire-proof for a minute, and the first high wind that catches a loose shingle—whoosh! goes half your shingled roof over into the next township.

Yet cedar shingles cost you just about the price of these guaranteed "Oshawa" Shingles—23-gauge toughened steel, double galvanized—good and wind-and-weather-proof and lightning-proof. Four-dollars-and-a-half a square buys "Oshawa" —ten feet by ten feet. Compare that with the present price of cedar shingles—how does it strike you?

And you can put on these "Oshawa" Galvanized Steel Shingles yourself, easily,—with no tools but a claw-hammer and snips. Simplest thing you know—can't get 'em on wrong. "Oshawa" Shingles lock on all four sides—whole roof is practically one sheet of double-galvanized steel, that never needs painting.

And GUARANTEED—don't overlook that. Guaranteed in writing, over the seal of a company with a quarter-million capital,—guaranteed in plain English, without any ifs or buts, for 25 long years.

That's the argument in a nutshell—cost the same as wood-shingles; fire-proof, water-proof, rust-proof, lightning-proof; easier to put on; and GUARANTEED. That's the "Oshawa" proposition! Tell us the measurement of any roof, and we'll tell you exactly what it will cost to roof it with less work and for less money.

Plenty of facts that concern your pocket-book come to you as soon as you ask for our free book, "Roofing Right." A post card will do to ask on.

Why don't you ask now?

One Hundred Years Ago

the picturesque stone fence was the strongest fence that could be built. But the scarcity of stone and its prohibitive cost—not to mention the length of time necessary to construct one—make the stone fence a luxury which few of us feel like indulging in.

But as far as strength and years of service are concerned, a worthy successor is found in the Frost Wire Fence. It is the strongest fence constructed today. It rivals a stone fence in the years of service it will give.

Unlike the stone fence, the Frost Fence is not constructed at a prohibitive cost. It is really a necessity instead of a luxury.

You need the Frost Fence on your farm because it will improve the appearance of your estate—Increase largely the value of your property. You need the Frost Fence because it will keep horses, cattle and pigs absolutely confined in the fields encircled by it. It holds them prisoners same as a stone wall would. They cannot break through or root under it.

Notice that the lateral wires on the Frost Fence are of a special grade No. 9 hard steel coiled wire, heavily galvanized. Any grade of coiled wire will expand, but the only kind we know of which will unfailingly contract is this special grade we are using on Frost Fence—the kind that always keeps Frost Fence taut.

Look at the stays on the Frost Fence. How rigid and straight they hold the fence! They are made of No. 7 hard steel wire—not the weak, flimsy No. 9, No. 13 or No. 15 soft wires used as stays on many fences.

See the difference between a Frost galvanized lock and others. Unlike others, the Frost Lock is the strongest, most unyielding part of the fence—not the weakest. And it practically welds the lateral wires to the stays where they cross each other, which assures a perfect distribution of any strain or enormous pressure that may occur—adds years to the life of the fence.

Contrast the appearance of the Frost Fence with other fence which has been up for the same number of years. You'll find the difference all in favor of the Frost.

Truly the Frost Fence is the strongest fence built to-day—the most solid kind of an investment. If you would like to know more about Frost Fence write for our Free Catalogue, which explains it in detail.

# THIS Year PLANT PEAS

Field Peas have sold high for several years,—75 and 77 cents a bushel, last year. This year's export demand will be keen,—profit there for shrewd farmers.

PPP

Two profits in a pea-crop,—the peas and the vines,—rich cow-fodder, valuable green manure, high in nitrogen. Now that the pea-bug has quit business in Canada, peas PAY and Pay BIG.

PPP

Easy crop to handle,—quick-growing,—does well even on "tired" land,—and a SURE MARKET at profitable prices for all you can raise. Plant peas early,—April and early May is best.

**BOYS FOR FARM HELP**  
The managers of Dr. Barnardo's Homes invite applications from farmers, or others, for the boys who are arriving periodically from England to be placed in this country. The young immigrants are mostly between 1 and 13 years of age; all will have passed through a period of training in Dr. Barnardo's English Institutions, and will have been carefully selected with a few to their moral and physical suitability for Canadian life. Full particulars as to the terms and conditions upon which the boys are placed may be obtained upon application to Mr. Alfred B. Owen, Agent, Dr. Barnardo's Homes, 214 Parley Ave., Toronto.
