Application to Parliament

NOTICE is hereby given that the Corporation of the Township of East Flamboro intends to apply to the Legislature of the Province of Ontario at the next Session thereof for an Act of Parliament for the following purpose:

To consolidate a floating indebtedness of Twenty-five Thousand Dollars (\$25,000.00) of the said Corporation, and to authorize the Corporation to provide by By-law to be passed without submitting the same to the taxpayers authorized to vote on money by-laws, for borrowing upon the Debenture of the said Corporation said sum of Twenty-five Thousand Dollars (\$25,000.00) to pay off the present floating debt of the Corporation. The existing Debenture debt of the said Corporation is as follows:

General Debenture Indebtedness \$27,026.68.

Debentures issued for School purposes, \$77,365.75.

Debentures for Drainage (local) \$2,818.74.

The said Corporation has incurred considerable expenditure in constructing roads and bridges, and as the tax levy of the said Corporation has been very high during the last 3 or 4 years, it would be very burdensome to the taxpayers to levy a higher rate to meet said indebtedness.

Foundation Planting

In last week's article one of the uses of shrubs mentioned was that of foundation planting. When the lawn is comparatively small and open to the street this form of planting is perhaps one of the most useful.

A border should be laid out in front of the verandah, or if there is not a verandah, then in front of the house. Start beside the bottom of the steps, say about five feet from the house, curve the line inwards, now carry it straight till near the end of the house when another curve outward should be made, rounding the corner for about three feet, then along the side as far as is desirable. If there is a neighbor's house close the side border would likely be shaded so five or six feet is all that the border should go unless care is taken to plant shrubs that are partial to a certain amount of shade. The same treatment is then carried on at the other side of the steps.

At no point should the border be less than three feet in width, nearer four feet is better, if a double row of shrubs is desired. A double row makes a much better appearance than that of the single row. Other styles of borders, may, of course, be used as the tastes of the owner may dictate.

Twenty feet is the average length of these borders and this requires say eight plants for the back and twelve plants for the front row, and these can be bought for about 40¢ each, a low price considering the years of service that shrubs give.

After the border is laid out dig the soil deeply, pulverizing it thoroughly; place small stakes at the places where the shrubs are to be planted. The tall growing varieties should be placed in the back row from four to five feet apart, and the low growing ones in the front row, staggering the rows so that a tall shrub will be flanked in front by dwarf ones. The border can be made gay in spring by planting clumps of Narcissus and Tulips in the fall between the shrubs.

Selection of tall growing shrubs can be made from such as Hydrangeas, Paniculata and Arborescees, Bush Honeysuckles, Mock Orange or Syringas, Forsythias or Golden Bells, Butterfly Bush, Japan Quince, Deutzias, Spiraeas, Tamarix, Snowballs, Weigelias, besides several others. The low growing varieties include Japanese Barberry, Blue Spirea, dwarf Deutzias, Spirea Anthony Waterer, Spirea Callosa in pink or white and Baby Rambler Roses, etc.

Foundation planting enhances the look of a house, giving it a much more home-like appearance and thus the value of the property is increased, something that is not overlooked by wide awake people who have their houses on the market.
