A meeting of the proprietors of the Canard dike has been called for Saturday, the 12th, to discuss the advisability of securing a competent engineer to make an estimate of the cost, and give plans and specifications for the construction of a new dike and abutment. The old abutment has been considered not very safe, for some time, and in case it became worse it would be necessary to make extensive repairs or else the new dike would have to be built. The new abutment would be at or near the Middle Ground nearly one half mile below the Wellington Dike, and would enclose about 200 acres of good land.

This is a year of violent storms. We had on Monday night one of the heaviest wind and rain storms that has ever been known in this county. All along this Street the effect of the wind was keenly felt. A large part of the fruit was blown from the trees and in most every orchard trees were split to the ground or torn up by the roots. The result has been a great loss to the farmers. While all have suffered some loss there are a few orchards that can be noticed more than others. Mr Fred Dickie had some fine trees almost ruined. Mr Freeman Eaton's loss was heavy, trees being broken, twisted and uprooted. Mr Ross Chipman, of Chipman's Corner, was particularly unfortunate. The wind about his orchard must have been like a cyclone judging from the destruction it made.
