

HEALTHIEST ONE IN THE FAMILY

No Sign Of Dropsy And Kidney Trouble Since Taking FRUIT-A-LIVES

MATTIE WARREN
Fort Robinson, Ont., July 28, 1915.
"We have used 'Fruit-a-lives' in our house for over three years and have always found them a good medicine. Our little girl, Mattie, was troubled with kidney disease. The doctor said she was threatened with dropsy. Her limbs and body were all swollen and we began to think she could not live. Finally, we decided to try 'Fruit-a-lives'. She began to show improvement after we had given her a few tablets. In a short time, the swelling had all gone down and her flesh began to look more natural. Now she is the healthiest one in the family and has no signs of the old ailment. We can not say too much for 'Fruit-a-lives' and would never be without them."

WILLIAM WARREN.
50c. a box, \$5 for \$2.50, trial size, 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-lives Limited, Ottawa.

White Ribbon News.

Woman's Christian Temperance Union first organized in 1874.
AIM.—The protection of the home, the abolition of the liquor traffic and the triumph of Christ's Golden Rule in custom and in law.
Motto.—For God and Home and Native Land.
HANCE.—A knot of White Ribbon.
WORKS.—Aglite, educate, organize.

OFFICERS OF WOLFVILLE UNION.

Article entitled 'Liquor and the Nation' in the 'Hesperian' last week.
The work of the Royal Field Corps in Canada as the basis of article by Raulph Carlyle, 'Alien Races in Russia' is the timely article by Laura De There are several excellent stories of a seasonable character.

A Canadian officer in France the Minister of Militia, Sir Ed Kemp.
We were all delighted to see the Conscription Bill passed its reading in the House. If it had been deferred and left without during this infernal struggle—ing disheartens officers and men quickly as to be under strength which state one man has to do work of three. However, all's that ends well.

The duty of every loyal Canadian to see that the men in France are not deserted and left without help but that everything necessary possible is done to keep the fighting forces up to strength.

France will allow the hunting game for the first time since the close season of nearly four years has resulted in a large crop of depredated animals. The season open only after the crop has been harvested and will be short. The government has decided that this measure is necessary to protect agriculture against the ravages of game, which has multiplied greatly in the years during which only restricted destruction of depredated animals has been allowed. Hares, rabbits and partridges are particularly abundant, while wild boar, and from the forests of northern France by the military operations have done considerable damage.

The Bible Chosen.

It is a new and interesting tribute to the Bible that the literary tests for immigrants entering the United States are now made from passages chosen from it. That is not because of the reverence that Christians feel for it, and Jews for some part of it, but because it is the only book that has been translated into almost every known tongue. The Department of Labor has prepared passages in more than a hundred languages and dialects.

RHEUMATISM ARRESTED

Many people suffer the tortures of lame muscles and stiffened joints because of impurities in the blood, and such succeeding attacks seem more and more frequent. The remedy is to purify the blood. Dr. Williams' Pink Pills for Pale People is the best. It is a blood purifier and a blood builder. It is a blood purifier and a blood builder. It is a blood purifier and a blood builder.

1917 Game Laws.

MOOSE.

Open Season begins September 16th, and ends November 30th. No moose meat shall be sold except between September 16th and November 1st.

No person, having killed or taken one moose, shall shoot at or attempt to kill another in the same year or season.

If a moose be killed or taken by two or more persons hunting or pursuing it in company, none of such persons shall have shot at or attempted to kill another moose in the same season.

No person, after having killed or taken, in any year or season, one moose, shall, in the same year or season, guide or assist another person when such other person is hunting or pursuing moose. This does not apply to a licensed guide, when acting professionally as such.

No person shall kill or hunt any moose under the age of one year, or any moose before the 16th day of September, 1918.

No person shall kill or hunt any moose on the island of Cape Breton before the 16th day of September, 1918.

No person shall set any snare or trap for moose or hunt moose with dogs.

Every person who kills a moose, whether the meat is offered for sale or not, is required within eight days thereafter to make an affidavit before a Justice or Warden, in the form required by section 9 of the Game Act, and shall exhibit to the Justice or Warden for examination by him the skull and antlers of such moose, with the skin of the neck and head attached thereto, and also the skins of the forelegs of such moose from above the carpal joint or knee to the hoof, and shall deliver to such Justice or Warden such skins of the forelegs to be destroyed.

No person shall sell or offer for sale the meat or other part of the carcass of a moose without having in his possession a certificate issued with respect to such moose under the provisions of said section 9.

Any person having in his possession a certificate issued as aforesaid shall within ten days thereafter send to the Chief Game Commissioner, or, if such certificate has been delivered to any person buying the meat for resale the person so disposing of the certificate shall forthwith notify the Chief Game Commissioner of the fact, giving the name and address of the person to whom the certificate has been delivered and the date of such delivery.

Every person who kills a moose shall within ten days thereafter send to the Chief Game Commissioner, by registered mail, a notice in writing, signed by such person, stating his name and when and where he killed such moose and whether it was a bull or a cow.

CARIBOU.
Open Season (for the Counties of Victoria and Inverness only) begins September 16th, and ends October 15th.

No person shall kill any Caribou in the Counties of Victoria and Inverness before the 16th day of September, 1918, or any cow or calf Caribou at any time or place.

No Caribou meat shall be sold, or exposed or offered for sale at any time.

(Continued next week)

Kidney Disease Overcome.

Mr. James Prouse, Cattle Dealer, Sheno, Sask., writes:—"For about ten years I suffered from Kidney Disease. At times I was laid with backache and derangements of the digestive organs. During that time I was treated by four different doctors. One day I read in Dr. Chase's Almanac about the Kidney-Liver Pills and began to use them. Altogether I used six boxes. All I need say is that I feel well now and attribute this condition to the use of Dr. Chase's Kidney-Liver Pills.

A little ward three miles of four or five summers, whose hair is somewhat of an exaggerated red in color, came in from play one day last week with a complaint to her mother that a playmate had said her hair was red. Her mother assured her that the color was Titian, but this did not satisfy the little one, who quietly stole upstairs for a look into a mirror, and came back to her mother with the remark, 'Mother, the mirror says it is red!'

PILES

Do not suffer from Piles. Dr. Chase's Ointment will relieve you at once. It is a certain cure for hemorrhoids, piles, and all other ailments of the rectum. It is a certain cure for hemorrhoids, piles, and all other ailments of the rectum.

At first the call was for men, money and money," says Food Controller Hanna. Now the cry is for men, munitions and food.

Wolfville Astonished By Merchant's Story.

A merchant relates the following: "For years I could not sleep without turning every hour. Whenever I ate canned gas and soured. Also had stomach catarrh, dyspepsia, etc., as mixed in Adler's relieved me. I bought Adler's B. cause Adler's has the entire elementary tract it relieves ANY CASE constipation, sour stomach or gas and prevents action of anything we ever send."

A. V. RANZ.
'I don't think a college education amounts to much.'
'Don't you? Well, you ought to look my boy's bill and see.'

UNCHARTED CASSIAR RICH IN MINERALS

Northern British Columbia Relied Upon by Veteran Prospector for Gold and Silver

A Vancouver Journal says: "Jimmy Moore, the veteran prospector of British Columbia, whose hills he roamed for 49 years, would like to see the Pacific Great Eastern extend from Vancouver to the northwestern part of this province. 'I do not,' he writes, 'as I know the great mineral resources of this northern country in gold, copper, silver, zinc, iron, coal and rare metals, as well as large stretches of ranch grass country, and I may say here that the Cassiar district, when once opened up with railway transportation, will be the greatest producing district of British Columbia.'"

Experts Know Values
Mr. Moore writes: "In support of this view I may be allowed to call attention to the report of such an eminent authority as Dr. G. M. Dawson, who visited the northern district in 1878. He gives in detail favorable opinions on the great potential wealth of the whole territory and remarkable finds of rich ore."

"Walker Creek is another unexplored territory for mineral. I have seen at Telegraph Creek some very rich samples of copper ore from this creek. If the government of British Columbia would get interested in opening up this rich and extensive mineral district of Cassiar with railway transportation, it would open up the richest and most extensive mineral district known in the province."

Many Kinds of Ores Seen
"There is an abundance of wood and water," says Mr. Moore, "matters of great importance in connection with mining. Means of railway transportation once provided, mine-operations should be carried on here at less cost than in dry, wooded regions such as are great portions of Arizona. On my last trip to the Cassiar district in 1907, I met at Telegraph Creek a very intelligent prospector, W. F. Hall, one of the very few prospectors in the Cassiar district at that date, who said to me that 'Cassiar of Dease Lake and south of Haskin Mountain for 100 miles in extent the country is practically unexplored, but what is known of it has shown surface croppings of copper, silver and gold ores.' Mr. Hall also said that the head of the Iskut River he considered one of the best districts in Cassiar to prospect for gold, silver, nickel and iron. The lower part of this river was formerly worked for placer gold. He also considered that in this section is a low pass that could be used for railway construction from Hazelton to the Stikine River."

CANNON TO KILL ANTS

It is hard to imagine big game killing anything except men and horses. In South Africa and other tropical countries, however, they are used to kill ants—the termites, or warrior ants. The ants are used to kill ants.

The ant hills of these particular ants are often 20 feet high and pyramidal in shape. Cattle climb upon them, without crushing them. A dozen men can find shelter in some of their chambers, and many hunters often wait inside them when out after wild animals—after the nests have been dismantled of course.

The ants construct galleries which are as wide as the bore of a large cannon, and which run 2 feet or 3 feet underground. If you built a house as big in proportion a working ant would live in a dwelling as big as a grand old Egyptian. These ants are frightfully destructive, and the only way to kill them off is to blow them and their nests to pieces with ammunition loaded with grape-shot.

MOST DANGEROUS HOUR

Celebrated Scientist's Thesis on "Rush Hour" for Microbes
A celebrated scientist, who has made a lifelong study of different forms of bacteria, recently made the interesting announcement that there are more microbes in the air at 9 o'clock in the morning and at 3 o'clock at night than during any other periods of the day. He says that he has also discovered that the percentage of microbes in the atmosphere is less at 3 o'clock in the morning and at 3 o'clock in the afternoon.

He has also noted that at or about 6 o'clock every morning and evening there were indications of the approach of the microbes "rush" hour. From that time on, a thick mist of microbes crowded with germs of all kinds, some bad, some good; and then, immediately after 9 o'clock the tide ran out; until it was always lowest round about 3 o'clock.

UNTOLD MINERAL WEALTH

Northern British Columbia Amazing One British Nobleman
The Marquis of Queensbury highly praised the resources of northwest British Columbia. Speaking of a tour, while in Winnipeg in 1917, he said: "The people of Canada need have no fear regarding the ability of the country to pay their war debt. The mineral wealth of the northwestern British Columbia mainland and islands is sufficient to pay the war debt of your splendid dominion and that of Great Britain as well, and still leave ample for generations yet unborn. It is simply marvelous. In fact, I do not hesitate to say that it is the greatest mineral region in the world. There is everywhere in that region a wealth in the way of minerals that the world requires. It reminds me of much of that section of the Great Mountains, from which the grand dikes of Russia have taken their fabulous stores of wealth, and it would not surprise me if it is of the same formation and connected by a dip below the sea."

Best Land and Time for Beans

Field beans planted in June mature a crop in ordinary seasons. Well-drained, limed loam soils of medium fertility produce the best crops.

Canada has no source of wealth more dependable, more profitable or more permanent than that represented by her rocks and herds.

To enable a man to walk on an inclined roof spiked frames, to be straddled under the shoes, have been patented.

Experiments in Indo-China have shown that it is possible to make cordage and certain forms of textiles from the fiber of the ramie plant.

In Denmark there is a two-story platform that will accommodate 1,500 animals and in which nearly all the work is done by electricity.

If the average farmer could see half as much in farming as the average city man does, what a difference there would be!

Although feeds are high, do not fail to give sufficient nourishment to young hatters when bagging up for the first time.

The Women of France.

It would be an education to the men and women of Canada to see the manner in which the women of France have risen to the necessities in that war-torn country. They are taking the place of the fighting men in every walk of life and are showing a strength and endurance that is really remarkable. Dejectedly reared women are cutting grain by hand, extracting the grain later by means of balls. They are plowing and cultivating, those women who three years ago were living in comparative ease. They are working on the docks as laborers. They are doing a thousand and one things that women were not accustomed to do and they are doing them well. In Canada the life of the people goes on much the same as before the war. There is no serious change in the women's work. They have shown their adaptability by taking the place of many men in banks, of flour and in some cases have accepted service.

No Chance for the Germs.

Disease Germs cannot live in rich, red blood. It is people in low vitality that fall victims to germ diseases. By using Dr. Chase's Nerve Food you enrich the blood, increase vitality and prevent disease germs from finding lodgment in your body. There's wisdom in prevention. It's easier to keep well than to get well.

THOROUGHBRED BLOOD GOOD FOR TROTTERS

Interesting Argument, Based on Records, by John E. Madden, in Book and Interview

John E. Madden, the great owner of thoroughbreds, said in an interview: "As a breeder of both thoroughbred and trotters I have given much time to research, and it struck me forcibly that the warm blood of the race horse appeared close up to the pedigree of our greatest performers at the diagonal gait. I make no claim that my little book contains every performer with thoroughbred blood as close as the second generation, but most of them are recorded and there is a sufficient number to convince even the most sceptical that the thoroughbred improves every family with which he comes in contact. 'Half-bred' were good."

Mr. Madden's volume on this subject shows that forty-five performers in 2:30 or better were out of thoroughly bred dams, and of these Palo Alto, 2:08 1/2, was the champion performer of his day, while another, Expresso, 2:12 1/2, was undoubtedly one of the greatest three-year-old trotters that the world has ever known. His campaign in 1914, when she regularly beat the best of the old horses in killing races of split heats, many for the seasonal performer of that year.

Credit to Stanford
Both of these great trotters were bred by Senator Stanford at his Palo Alto stud in California, and it is largely due to this expert's judgment that the thoroughbred race horse is able to show his quality in connection with the trotting family. Senator Stanford believed implicitly in the cross of the bred-standard-bred cross and bred long enough to prove its soundness. Of the forty-five performers which the author designates as 'half-bred trotters,' there are famous ones, including Proof of the Pudding, 2:28 1/2, by Peter the Great, 2:27 1/2, of Sovereign, by (imported) Bayon d'Or, a mare which has thrice defeated and other good winners on the turf.

Telephone Pole, 120 Feet
Pole Weighing 8,000 Pounds and Requiring Engine to Hoist

One of the tallest telephone poles in the world is where the wires of the Pacific States Telephone Company cross the Chehalis River, near Aberdeen, Wash. This pole is one single stick of Washington fir, 18 inches at the butt and 8 inches at the top. The pole weighs 8,000 pounds and is 120 feet high. The stick was cut at a point twelve miles distant and towed down the river, where it was erected by twelve men using a two-horse power hoisting engine. For making attachments to the pole and raising it a five-eighths steel cable was employed and run through 10-inch steel blocks.

Fuel Box in Seat Filled from Floor Trapdoor

A fuel box for the fireplace may be easily arranged so that it is unnecessary to carry the fuel through the living room, thus avoiding soiling floors and rugs. It may be arranged, as shown, for a summer cottage, or even in the living room of a home.

The fuel box is built under the seat of a comfortable settle, and the wood, coal, etc., are placed in the fuel compartment by raising it up through trapdoors in the floor at the center of the box. The fuel is placed at each side of the trapdoor behind a seat partition, and the trapdoors are closed when not in use. The seat of the fuel box is divided at the middle and hinged to swing back. Suitable cushions should be provided for the seat.—Popular Mechanics.

The World's Largest Electric Steel Furnace is at Duquesne, Pa.

The world's largest electric steel furnace is at Duquesne, Pa. It is a 100-ton electric steel furnace, and is the largest of its kind in the world.

To Conserve Canada's Food

Now is the time to get your furniture upholstered. The Canadian Pacific Railway Co. has played an important part in the conservation of food in the world war in a great many ways, and has again been honored by the recent appointment of Mr. W. A. Cooper, one of its prominent officials, to the Food Conservation Committee. Mr. Cooper has had considerable experience in dealing with food, having been connected with the dining cars of the Canadian Pacific for twenty years, and his wide knowledge will be of much value to the committee.

FOR SALE

Those interested in building lots to the west end, would do well to confer with E. C. Johnson as he is now offering for sale the only available lots at this centre.

Every 10c Packet of WILSON'S FLY PADS

Will Kill More Flies Than 100 Other Fly Pads.

Clean to handle. Sold by all Drug, Grocers and General Stores.
