Food Adulteration.

Commercial cream of tarter bas been the subject of analysis and report by the food inspection section of the De partment of Inland Revenue. The product of the fermentation of wine They contain both tartrate and sulp hate of lime, and the presence of these salts in cream of tarter, while they les sen the value of the article for purposes of bread-making do not reflect on the good fai h of the manufacturer. There is no fixed standard in the case and samples that showed only 8r per cent, of bi-tartrate of potash, the chemicial name for cream of tarter, are classed genuine. By solution and re-crystallization some manufacturers reach a standard of roo per cent, while the general run of samples was from 90 per cent, up. The adulteration that gives just ground of complaint is due to the introduction of foreign mat erials, sometimes starch, but generally

chemical, which bakers in some places are forbidden to use. The analyses included 225 samples' fifteen from each inspection district. Of the whole 180, or 80 per cent, were pronounced dians in these provinces, has the fol- genuine, that is no foreign substance MINARD'S LINIMENT Co., LTD. had been used to add to their bulk or weight; four were classified as doubt the most memorable event in the his. ful and 41 or 18,22 per cent., were tory of the Micmacs, as three hundred condemned as adulterated. It is noted that the most general and worst received baptism at Port Royal, now adulteration was in the province of Annapolis Royal, N S. At their Quebec and the Toronto district. In head was Grand Chief Memberton- the Quebec districts 23 out of 45 sam Micmac 'Maopelio or General ples were adulterated, 10 of the 23 be-Leader.
