Household Notes.

Whole wheat bread supplies much more iron than white bread. Chopped figs will add a good flavor to the fruit and nut salad. Radishes make an excellent breakfast relish in the early spring. Spinach is in a class by itself, because of its large amount of iron. Cucumber served with peas and sauce is an excellent luncheon.

Boiled squash left over from a meal may be made into a delicious soup. Always have the board well floured before beginning to knead bread. Creamed salt codfish should be finished with cold hard-boiled eggs sliced.

Salad that has a sweet pepper minced in it will have a snappy flavor.

Dried figs and raisins, chopped, make good filling for sweet sandwiches.

When making uncooked frostings a confectioner's sugar, be sure the jar is sifted.

Equal parts of beeswax and turpentine rubbed on dull floors will brighten them.

Plenty of "waste" or rough food boiled each day will lessen the family liability to colds.

Did coconut to lemon ice cream be freezing it and you will give it individual flavor.

Thin, after washing, will retain its shape if a little borax is put into the rinsing water.

As much green food, like parsnips and watercress, as is obtainable at the time of year.

Hot luncheon for the school children when they come home at noon is not a necessity.

Rubber bands for fruit jars should be new each season and dipped in water before using.

Assels, cooked with a little garlic and water, can be served with a red butter sauce.

A little turpentine put into the water for washing windows or mirrors is an excellent method.
