#### A Heart to Heart Talk.

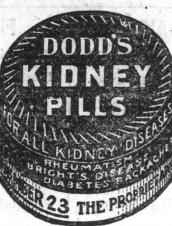

From the Ladies' Branch of the

(By JULIA SALTER EARLE, Presi dent of Branch.)

The girls of the Branch wish me to thank Mr. Monroe and Mr. Alderdice for acceding to the wish of the Union in granting the Insurance scheme also for their kindness to one of the girl employees, who they thought not sufficiently clothed, and who they supplied with proper clothing, also seeing that this Union sister was supplied with a suitable home. They also feel very grateful to Messrs Monroe and Alderdice for their thoughtfulness in supplying and fit-ting up a room for the Union men (or our N.I.W.A. brothers) so that they can hold their local meetings surplus fund big enough to pay the motto: all for each, each for all. girls their money when ill. This sick girl taken from the home very often to one of our hospitals, leaves a big care behind her. What is to become of those at home is her cry as she gets in the ambulance. We must say a word in the way of thanks to our whole-hearted Health Office official, Mr. Lawlor. Earth will not reward him, but Heaven surely will. He has helped us out many a time, and only for his timely aid, I do not know what the consequences would have been.

I know of no better topic that the ladies of the "Current Events Club" could discuss than "The Factory life of the City of St. John's." I can assure them they will have their eyes opened if they will place facts before them. As many of the wives of the Directors of these factories, or shareholders of these factories, are mem-bers of the "Current Events Club," I am sure that their influence would be a very immense help to me in this great work. I have been told from reliable people that many of the la-dies think that the depth of the work consists in dealing with the domestic question. One lady said to me personally, "I will shake hands with you and wish you every success in your work, if you do not touch the domestic question." Let me give an answer to these ladies and tell them the N.I.W.A. "Ladies" Branch" has had much greater problems than the domestic question to deal with since its
formation. Its work has been: Seeing
