love in human relations, and the difficulties will vanish like mist before the sun.

# Selfishness Regnant.

(From the Montreal Gazette.)

constituted authority everywhere are found in the disintegration of economic laws, due to the unparalleled struggle in Europe; the mpaired respect for human life, inspired by the unceasing hecatombs which the war demanded for four years: the dethronement of the high sanctions which kept society together; and, above all, the non-fulfilment of the large desires engendered by alluring word pictures of a new and hetter and more enticing world, which

did not materialize for the asking. In takes the form of murdering police officials in broad daylight in the city of Dublin; in Britain it is both political and economic; in France, in Germany, in the United States, it is chiefly economic; but, in all countries, its chief expression is violence; and in

the United States, it discloses itself sent system of government, and subgenius is that all persons above the enemies of the state. Governments have used, now verbal persuasives and, again, machine guns. They have tried to find the root cause of the dangerous experience he would make the rule outbreaks in big centres; they have supply and demand, a very large read: "Whether there is too much or appointed experts; they have passed too little of a commodity an increase laws; but . . . the happy world of the hectic dreams of the workers and and the fighters in the war have not been realized. And this is the trouble—that human selfishness is still so regnant in the world that the large (From the London Chronicle.) The Viceregal Lodge in Phoenix to be enthroned in the laws of the

# The Tide's Power.

We are accustomed to look upon the tides as representing enormous unutilized power. If we could only the machinery in the world. But is affection for the Irish people, and put them to work on a scale sufficient wound up by asking them to go away, ly great. But that this ever be practic able, economically, is declared doubt ful.—Philadelphia Public Ledger.

We've talked a lot about the Cost: no opportunities we've lost to make a f e w remarks; we've told how we have felt the for hempen ropes to lynch the profiteering sharks. Now comes the

pinch, and called gentle spring again, when ear-

nest, sane and thoughtful men will cease to rend their duds, quit yawping by the village pound, and spade up fourteen roods of ground, and plant a lot of spuds. A garden full Ireland the unrest is political, and of useful greens, of sparrowgrass and Lima beans, is much to be desired; a garden where the squashes thrive and beets are seen in blocks of five, will make the Cost look tired. A bed of onions by the fence is better evidence of sense than many frenzied yawps: and nothing finer is in sight than is the gardener's delight, when in secret plots to overthrow the pre- harvesting his crops. The country's full of fertile earth; all kinds of soil stitute that of the soviet, of which the of sterling worth, is strewn around our shacks; and in that soil let's moujiks' must be shot at sight as plant some peas and Brussel's sprouts and things like these, and thus get down to tacks. When to their gardens men repair, and gather luscious numpkins there, and carrots red and fine, and turnips full of wholesome juice, and cabbageheads that beat the deuce, the Cost takes in its sign.

#### Eyes and Illness.

weather by reference to a barometer, not completely cured. relations in the conduct of its affairs. Stafford's White Pine Eucalyp- so can we tell whether a person is in good health by examining the eyes. the outer edge, morganic iron by This method of diagnosing disease, from the eyes is known as the "Iris science," and, according to Dr. Andershon, of Denmark, is the only reliable method by which the seat of a disease can be discovered.

The science was discovered by Hungarian. During boyhood he caught an owl which had broken its leg, and noticed that a black spot appeared in a certain part of the iris. Some years later he noticed the same black spot in the iris of a man who had sustained a broken leg. This experience caused him to investigate, and he found that every disease could be read from a certain portion of the iris.

When a disease is cured white line enclose the dark spot that proclaim
