Why?

Use damp, lumpy, acid Ammonia Fertilizers when you can buy Ammonia cheaper in

Cyanamid

and get your soil limed at the same time for nothing?

Cyanamid

Is a fine, dry, dustless powder
Contains about 20 % available ammonia and 18 % lime
Can be stored indefinitely without loss
Is easily mixed, handled and spread
Is not easily leached away by rain
Acts rapidly and steadily in the soil
Neutralizes acids and produces sweet fruits
Is endorsed by every Government Experimental Station in Europe
Is made in Canada

PRICE

We can quote figures that will interest you
Special Terms for experimenters. Write for Particulars

AKERS, MASON & BONNINGTON
448-449 Confederation Life Bldg., TORONTO, ONT.

The trees were the best rooted we ever saw and every one of them grew — Howard G. Fisher.

Auburn Nurseries Pedigreed Peaches

2 Years Old. Grown by G. E. Fisher & Sons
Dulverton Fruit Farms, Queenston, Ont.

These are the kind of trees to buy. No storage stock about these, but the thrifty, healthy, sturdy kind that stand in the nursery row all winter, and are fresh and bright in the spring, and reach you in fit condition to start right into business. We still have a good stock of Peach, Cherry, Pear and Plum, Yearling Apple and Quince.
