

FOR THESE REASONS

To tell all the reasons why we believe your choice of a cream separator should be the Standard would be impossible in this space, but here are four: **First:** Because the

Standard

Cream Separator under ordinary conditions skims to .01 per cent. or less. It loses but one-tenth of a pound of butter fat in 1,000 pounds of milk skimmed. The ordinary separator loses a full pound. **Second:** Because the Standard has a wide open bowl, and no cream or milk tubes to clog up. Everything easy to clean. **Third:** Because the supply can is more than a foot lower than on ordinary machines. No high or awkward lifting to do with the Standard. **Fourth:** Because the Standard has a self-oiling system and lubricates its working parts automatically all the time it is running.

The Standard will save more time and labor, and make more money for you, than any other cream separator. Try one and let the machine prove these facts.

FREE—Write for the Standard Booklet, giving a full description of "The World's Greatest Separator," also folder entitled "Skimming Results."
