NEWS OF THE MINES.

Vancouver, B. C., 22.—The Dorothy Morton mine, up the coast, crushed 1395 tons last month, which yielded \$13,130. Since the mill started crushing last December, the yield has been about \$50,000.

An Australian has bonded claim owned by W. J. Yarks, on Lynn Creek, just above Moody and opposite the east end of the city. The amount of the bond was \$10,000, and \$3000 has been paid on it.

Riot Act had to be read at Columbia the other day, over trouble connected with the big hotel there.

A notable event in the progress of Vancouver to future prominence as a mining trade centre, was the beginning of work yesterday by Mr. Pellow Harvey, as the provincial government-assayer. As a result some \$70,000 worth of Klondike gold dust and nuggets, is now being satisfactorily assayed and otherwise treated. The returned Klondiker was en route for Seattle to have his precious metal assayed in that city, but hearing that the British Columbia Government has established an assaying office in Vancouver, thought he might save himself trouble and risk by visiting Mr. Harvey's office. The Official assayer had another interesting visitor this week. On Monday a man deposited seven pounds of quartz at his office for assaying, and stated that he had about fifty tons on the dump awaiting the result of the assay. Mr. Harvey treated the quartz, and from the seven pounds they obtained \$140 worth of gold. The man declined to disclose the location of his property, except that it was situated in this province.

FONTENOY.

Victoria, B.C., June 21.—The Fontenoy Gold Mining and Milling Company held their first general meeting of shareholders yesterday. The Fontenoy mine, Camp McKinney, whose stock is held by strong western syndicate, is rapidly acquiring a reputation as an early bonanza. The base ledge running through the property, north and south, has been thoroughly exploited. Two shafts sunk upon 500 feet, 65 feet in depth respectively, proved the ledge to be six feet wide in northern, and seven feet wide in southern portion.

Assays gave as high as \$120 per ton in gold, silver and lead, and none lower than \$40 per ton. The machinery, now being put in place, will enable the work to be done on these shafts, and by next week a drift will be commenced from the northern shaft to cut Cariboo Camp McKinney ledge at a depth of one hundred feet. A thirty-

foot shaft has been sunk in Cariboo ledge, above where the drift will strike it, and there is five feet of good-looking blue quartz in the bottom. Over 300 tons of ore, taken from the shafts of the base ledge, is lying on dump.

SPECIALS.

TORONTO MINING EXCHANGE.

Toronto, June 21.

Closing sales:
