

Canada Atlantic Elevators.

The two elevators built by this line & its auxiliary, the O. A. & P. S. Ry. during this & last year, are illustrated in this issue. The illustration given below shows the elevator at Coteau Landing, Que., on the St. Lawrence

River, the other illustration, on pg. 267, shows the elevator on Depot Island, Parry Sound, Ont., the Georgian Bay terminus of the system. The Depot Island elevator was built last year to receive grain from boats for transfer to cars for shipment eastward. It is of the storage type, & is 80 ft. wide by 290 ft. long,

with bins 70 ft. deep. It has a capacity of 1,000,000 bus. It stands back from the face of the dock 100 ft., & on the wharf is a marine tower containing a marine leg of 15,000 bus. capacity per hour, & all grain for this elevator is received by it. The leg is supplied with a pusher & marine shovels. In
