

THE MATHESON SAMPLE CARDS.

The Wm. J. Matheson & Co. have sent us a synopsis of the sample cards of new colors issued by them for the past month, from which we make some selections.

Paper Dyed in the Pulp.—This new pamphlet contains three hundred and eighty-four (384) dyeings, which have been produced by the application of acid, basic and diamine colors. The dyeings produced with the diamine colors are of particular interest to the paper industry, on account of their extreme fastness to light, in which property they far exceed any other dyeings that have hitherto been produced on paper.

Full dyeing directions are included in this publication, making the application of these dye stuffs to this special industry of great ease and importance.

Cyanole F F, Patented.—Bulletin 75.—This new bulletin contains four (4) dyeings upon woolen yarn and piece goods, illustrating the results obtained with this new brand of the Cyanole group. The shades produced are considerably brighter and purer than those obtained by the use of the older types, and its adaptability for the dyeing of wool is well shown in this bulletin. Its application is also minutely explained.

Scarlet E P, Patented.—This new scarlet is particularly well adapted for the dyeing of paper, and is in shade midway between our well-known Roccellino and Croceine A Z. It dyes pulp quite readily and evenly, and is of value where bright shades of red are desired for this purpose.

Bismarck Brown, O W.—This new, mordant dyeing brown belongs to the well-known group of Bismarck Browns, which it resembles in all of its properties. It possesses good covering powers, and its cheapness

makes it adaptable for purposes where depth of shade at a low figure is desired.

Tropaeoline R N, Patented.—This new wool yellow dyes a very much bluer tint than our well known Tropaeolines, and is well adapted for the dyeing of brownish, yellow shades upon wool. It possesses all the properties of our Tropaeolines.

Cyanole 3G, Patented.—This new member of the Cyanole group dyes similarly to the other members of this line of colors, but is more greenish in tone of shade than our older brands. It possesses the well known fastness to light, milling and washing, that has made our Cyanoles of such great value.

Blue P C.—This new blue belongs to the Water Blue group, and is particularly suited for the dyeing of hats. Its even dyeing properties and great solubility render it very valuable for the shading of hats, where a bluer tone of color is desired than can be obtained with the colors now on the market.

Jet Black 09097.—This new black is of interest for paper dyeing, where a shade of good fastness and great cheapness is desired.

Juto Black 09624.—This new black is similar in properties and shade to Jet Black 09097, mentioned above. It finds application in the same industry.

Diamine Beta Black B B, Patented.—This new member of our Diamine Beta Black series possesses the properties of our Diamine Beta Black B, mentioned in Dye Stuffs, page 148, except that it dyes considerably bluer. The property of the Diamine Beta Blacks to produce black dyeings when diazotized and developed with Beta-naphthol, makes them of peculiar interest and value where black dyeings are desired, after development with Naphthol.

Anthracite Black E G, Patented.—This new member of our Anthracite Black Colors

By Special Warrant

NOTICE

MEMBERS of the Canadian Manufacturers' Association and others visiting Toronto during the Fair are cordially invited to call at our Office and avail themselves of the opportunity to inspect, and, if they so desire, to use our unrivalled facilities for exploiting **CANADIAN EXPORT TRADE**.
Fulllest information freely and cheerfully given.

KELLY'S DIRECTORIES, Limited

28 Victoria St., Toronto, Ont.

The McInnes Indicator...

(Patented).

With Vulcanite Sheathing for all Speeds and Pressures. Adopted by the British Admiralty.

SPECIAL INDICATORS

For Gas and Explosive Engines, Ammonia Compression Machines, Torpedo Boats, Launches and Locomotives.

Patent Flexible Unstretchable Wire
Cord for Indicator Leads.

Catalogue on application.
SOLE MAKERS

T. S. McINNES & Co., Limited
42 CLYDE PLACE,
GLASGOW, - Scotland.

**The Jones & Moore Electric Co.,**

Manufacturers and Contractors
