

AN ARKANSAS MIRACLE.

A REMARKABLE STORY OF INTEREST TO EVERY WOMAN.

A Young Woman Who Was Literally Fading Away—Physicians Pronounced Her Case Hopeless—How She Was Saved.

From the Arkansas Democrat.

The story of renewed health told in the following article has been carefully investigated by the Democrat, and is of the deepest interest to all parents. The condition of Miss Clements is that of thousands of girls in our land, whose health and vitality is slowly but surely being sapped away. Pale, listless and sallow girls meet us on every side, and unless the same prompt measures are taken as in the case of Miss Clements, a premature grave is the inevitable result. Lulu Clements, the nineteen year old daughter of Mrs. Cora V. Clements, one of the most prominent residents of Lonoke, Ark., was attacked with a mysterious, wasting disease over a year ago, and despite the strenuous efforts of the local physicians she continued to grow worse. Her blood had turned to water, she suffered intense agony, and was almost ready to give up life when relief came. Her story is best told as related by her mother to a Democrat reporter:—

"In the fall of 1892 my daughter began to show signs that some disease was wrecking her system. Despite the constant attention of local physicians she grew worse. Her complexion was pale, and she became almost as white as marble. She complained of heart palpitation. Her feet and hands were cold, and she was almost driven into hysterics by racking headaches and backaches and shortness of breath and other distressing symptoms. All these conditions beloken anemia, or in other words watery and impoverished condition of the blood, which could not perform the functions of nature. She had no appetite; for many days she did not eat enough for a child to subsist on.

"Her condition grew from bad to worse, and becoming alarmed, I sent her to prominent physicians in Virginia, Tennessee and Little Rock. All efforts of this nature to regain her health proved fruitless. Patent medicines of many kinds were tried and given thorough tests, but without any apparent effect towards improving the patient.

"Myself and daughter had almost given up in despair, having almost concluded that a restoration of her health was an impossibility. In the Arkansas Democrat I espied an advertisement of Dr. Williams' Pink Pills for Pale People, which claimed that they would give ready relief to persons suffering from a disease the symptoms of which were the same as in the case of my daughter. I purchased some of the pills and commenced giving my daughter three pills a day. Before the first box had been taken an improvement was noticed. Color in her face was noticed, and her appetite returned. The terrible headaches and backaches ceased, and she could breathe more freely. When the fourth box had been taken she was entirely well, and since then has enjoyed excellent health. She is now robust and full of life, making our family happy once more. Quite a contrast to the situation six months ago, when everybody thought she would die.

"I think Pink Pills the best medicine in the world for the blood, and have recommended them to several citizens of this place, who have been restored to health by its use. Mrs. Henry Brown was in a very bad condition. She tried the Pink Pills, when she improved rapidly and is now a very healthy woman."

The discoverer of Dr. Williams' Pink Pills for Pale People certainly deserves the highest tribute that pen can frame. His medicine has done more to alleviate the suffering of humanity than any other medicine known to science, and his name should be handed down to future generations as the greatest savior of the present age.

Druggists say that Dr. Williams' Pink Pills have an enormous sale, and from all quarters come glowing reports of results following their use. In very many cases the work has been accomplished after eminent physicians had failed, and pronounced the patient beyond the hope of human aid. An analysis shows that Dr. Williams' Pink Pills contain in a condensed form all the elements necessary to give new life and richness to the blood, and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, sciatica, neuralgia, rheumatism, nervous headache, the after effects of la grippe, palpitation of the heart, pale and sallow complexions, nervous prostration; all diseases depending upon vitiated humors in the blood, such as scrofula, chronic erysipelas, etc. They are also a specific for the troubles peculiar to females, such as suppressions, irregularities, and all forms of weakness. They build up the blood, and restore the glow of health to pale and sallow cheeks. In men they effect a radical cure in all cases arising from mental worry, overwork or excesses of whatever nature.

Dr. Williams' Pink Pills are manufactured by the Dr. Williams' Medicine Company, Brockville, Ont., and Schenectady, N. Y., and are sold only in boxes (never in loose form by the dozen or hundred, and the public are cautioned against numerous imitations sold in this shape) at 50 cents a box or six boxes for \$2.50, and may be had of all druggists or direct by mail from Dr. Williams' Medicine company from either address.

Burdock BLOOD BITTERS.

UNLOCKS ALL THE CLOSED SECRETIONS OF THE BOWELS, KIDNEYS AND LIVER, CARRYING OFF GRADUALLY, WITHOUT WEAKENING THE SYSTEM, ALL IMPURITIES AND FOUL HUMORS. AT THE SAME TIME CORRECTING ACIDITY OF THE STOMACH, CURING BILIOUSNESS, DYSPEPSIA, HEADACHES, DIZZINESS, HEARTBURN, CONSTIPATION, RHEUMATISM, DROPSY, SKIN DISEASES, JAUNDICE, SALT RHEUM, ERYSIPELAS, SCROFULA, FLUTTERING OF THE HEART, NERVOUSNESS, AND GENERAL DEBILITY. THESE AND ALL SIMILAR COMPLAINTS QUICKLY YIELD TO THE CURATIVE INFLUENCE OF BURDOCK BLOOD BITTERS.

MINING.

Mineral samples sent to the CHITIC office, accompanied by a fee of one dollar, will be submitted to a thoroughly competent assayer for a preliminary examination and slight test of contents. The results will be communicated to senders of samples, and if full assays are deemed advisable, they will be notified and instructed as to amount of fees to be remitted.

MOOSE RIVER.—Mr. D. Touquoy came to the city on Tuesday with his regular monthly brick of gold, the clean up in this instance yielding a bar weighing 54 ounces.

PERSONAL.—We had the pleasure this week of a visit from Mr. C. Ochiltree Macdonald, who passed through the city on his return from Montreal. He is at present closely studying the coal question, but will eventually enlarge his field of labor to include iron, iron smelting and gold. The good work that Mr. Macdonald is doing in so intelligently laying before the capitalists of the world the extent and value of our mineral resources is deserving of all praise, and its value is hard to estimate.

Mr. J. M. Reid, manager of the Oxford mine, and Mr. G. J. Partington manager of the Whiteburn mine, left on Tuesday for a visit to Chicago and the World's Fair.

The *Atlantic Weekly* was decidedly off in stating that Manager Reid had some weeks ago returned from a visit to Chicago, as per item copied into the *Critic*.

Capt. Geo. Macduff of Waverley, agent for the Crawford mill, was present at the test of the Electrical Chlorination process of ore treatment at W. W. Howell's, an account of which appeared in our last issue.

GOLD STEALING.—In another place we mention that two parties have been remanded for trial on the charge of stealing gold from the Hardman and Taylor property at Oldham. They have elected to be tried by County Court Judge Johnson, and we have no desire to refer to their case in the remarks which follow.

Gold stealing it is shrewdly surmised has been carried on by dishonest miners ever since the beginning of work on our gold leads. The coarse gold which is found in most of our gold mines is a great temptation to the miners as it is easy for a dishonest one to secrete about his person in a manner that it is almost impossible to detect a very valuable quantity of gold. Where there are a number of men employed in a mine if they are dishonestly inclined they can easily steal enough gold to render what ought to be a paying property a failure and loss to its owners. It is a sneaky betrayal of trust and if the parties are detected at it, they should be punished to the full extent of the law. If reports are to be relied upon the German lead at Waverley, which was enormously rich, never paid the owners, so great was the loss from stolen gold. Many miners who are perfectly honest in all other respects seem to look on gold stealing as not criminal and a severe example or two are needed to show them the heinousness of the offence. To steal from the very men who pay them liberal wages for the work is not only basely criminal but it is also the height of folly, as by their own act miners are driving capital out of the business and curtailing the field of employment for themselves.

In the case about to be tried the men are accused of stealing the plates and gold and if they are proved guilty there is this to be said in their favor, that while they committed a bold and risky robbery they did not combine treachery and robbery as does the miner who steals from his employer. To the credit of the miners be it stated that as a class they are the hardest workers and most trustworthy men in the community. Our remarks only apply to exceptions to the rule.

And what shall I say more? for the time would fail me to tell of all the virtues of Puttner's Emulsion.

COMMITTED FOR TRIAL.—Alex. and Charles Greno, charged with stealing from the Hardman and Taylor gold mine, Oldham, were committed by S. pondiary Griffin Saturday at the supreme criminal court. The accused are not colored as stated. The gold and plates were stolen at night, the former in buckets full. The buckets of sand being heavy, the thieves were obliged to put them on the ground at times to rest. In this way the robbers were tracked, as some of the sand was left on the ground.

HARD COAL SEAM IN N. B.—Men boring for a well on the farm of Ronald Keith, Salisbury, last week, discovered a seam of hard coal, which it is believed will be valuable. Parties have been prospecting on the property at different times for coal, but failed to strike anything of value.

MINING OUTLOOK.—The gold mining outlook presents no new features of importance, but in some other branches of mining there is considerable movement. After years of patient work in which he met with much more discouragement than encouragement a very determined individual has about succeeded in carrying through a business which will result in the extensive mining of a mineral which exists in large quantities in the Province, but which has remained undeveloped up to the present time. The new industry will furnish profitable employment to many men, and quite a village will certainly spring up in a very sparsely settled section of the country. We are not at liberty to give details at present, but hope to do so at a later date.

ARE YOU NERVOUS,

Are you all tired out, do you have that tired feeling or sick headache? You can be relieved of all these symptoms by taking Hood's Sarsaparilla, which gives nerve, mental and bodily strength and thoroughly purifies the blood. It also gives a good appetite, cures indigestion, heartburn and dyspepsia.
