

# 5 Seconds by the Watch

PROMPT and complete solution of its components is what the physician wants—and should demand—in a hypodermatic tablet. Why accept a tablet that merely disintegrates in water? And that is just what some hypodermatic tablets do—fine, undissolved particles settling to the bottom. Such tablets are worse than worthless in an emergency.

## PARKE, DAVIS & CO.'S HYPODERMATIC TABLETS

dissolve freely and fully, forming a clear solution, without residue. *Test one by the watch!* Drop the tablet into a syringe partly filled with lukewarm water. Shake vigorously. In five seconds

(or less) it will have dissolved completely. *Try it!*  
**PARKE, DAVIS & CO.'S HYPODERMATIC TABLETS are true to label. They are active. They are of uniform strength. Specify them when ordering.**  
 Vials of 25—not 20, as supplied by other manufacturers: 25 per cent. more medication, with no extra cost to the physician.

# Delicious Buttermilk

**EASILY PREPARED, RIGHT IN ONE'S OWN HOME,  
WITH LACTONE TABLETS.**

Lactone is a selected culture of lactic-acid bacteria, in tablet form. One tablet will convert a quart of fresh milk into buttermilk in 24 to 26 hours.

**LACTONE BUTTERMILK** is better than dairy buttermilk, better than farm buttermilk. It is quite as palatable, quite as appetizing. It is more nutritious, more nourishing, retaining, as it does, all of the food elements of the sweet milk. In ordinary buttermilk, of course, much of the nutritive value of the milk is lost in the removal of the butter-fat.

Physicians are advised to give Lactone Buttermilk a personal trial. Many are now using and prescribing it with much satisfaction.

Lactone Tablets—bottles of 25.  
 With each package are full directions for preparing Lactone Buttermilk.
