 Telex: 061-8408

A.W. Hart
 General Manager

Arlink Industries was formed in 1974 as the manufacturing affiliate of Arbell Inc. Today, the company is probably the best known Canadian designer and manufacturer of versatile workbenches, workstations and related accessories specially suited to the diverse needs of the laboratory environment. Unlike the many types of conventional stamped and welded industrial benches, Arlink designs have tubular steel components, can be assembled with few tools, offer a wide choice of standardized components, have simple classic lines and are easy to clean and maintain.

The Arlink Series 82 was conceived and developed for laboratories and industries that demand a greater degree of adaptability to accommodate the requirements of

new projects or rapidly changing technologies and the need for the more efficient use of space.

Thomas Amormino
 President

AVA Medical Products of Canada Inc., a Canadian-owned company, manufactures a complete line of disposable hypodermic needles and disposable three-piece plastic syringes. AVA hypodermic needles are produced at the Windsor, Ontario plant.

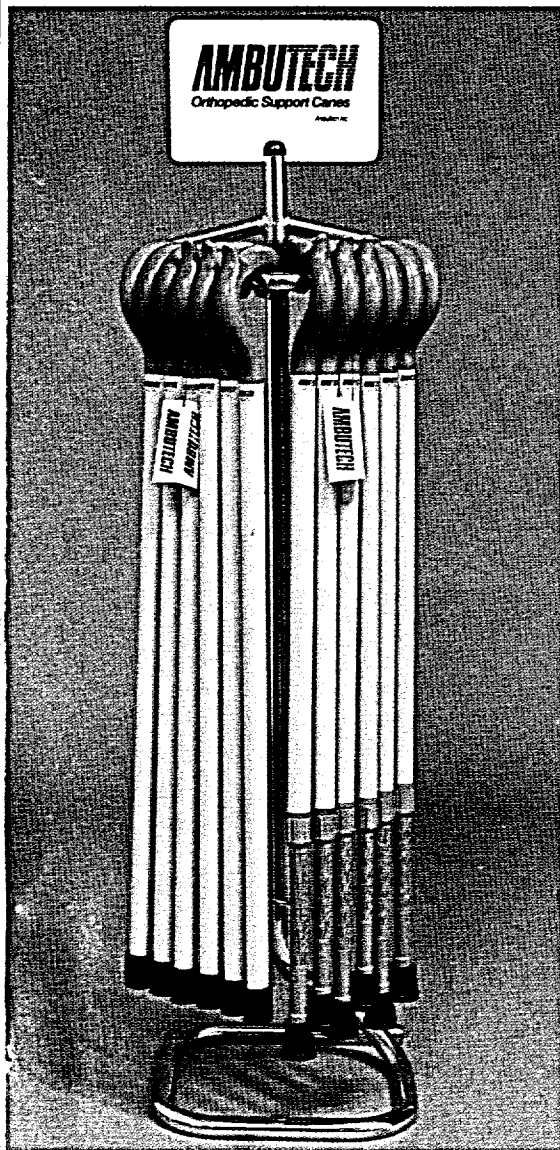

AVA uses only the best of materials and technology to ensure the highest quality in its products that meet or exceed stringent international standards. All AVA needles fit either slip tip or luer lock tip syringes and are triple sharpened and coated to provide the smoothest tissue penetration. AVA needles are made with the minimum allowable wall thickness for easy infusion and minimum patient trauma.
