

The direction-finding station or stations called prepare to take the bearing; if necessary they warn the direction-finding stations with which they are connected. As soon as the direction-finding stations are ready, each of the stations as its provided with bearing apparatus reply to the mobile station in the alphabetical order of their call signs by their call sign followed by the letter K.

In the case of direction-finding stations which are equipped, the station called warns the stations of the group and informs the mobile station as soon as the stations of the group are ready to take the bearing.

After having, if necessary, changed to the new transmitting wave, the mobile station by sending its call sign together with any other signal needed for a bearing sufficiently prepared to permit the bearing to be taken.

The direction-finding station or stations which are equipped with the operation means the word QTE ("") one bearing in relation to the word "bearing" preceded by the number of the observation and followed by a group of three figures (000 to 359).

The time of the observation and the bearing of the mobile station in relation to the direction-finding station.

If a direction-finding station is not equipped with the operation, it requests the mobile station to repeat the transmission indicated under (c) in the instructions at the beginning of the section.

As soon as the mobile station has received the result of the observation, it repeats the message to the direction-finding station which then states that the repetition is correct. When the direction-finding station corrects by repeating the message, the mobile station corrects the message. The message received by the mobile station is in relation to the word "bearing" preceded by the number of the observation and followed by a group of three figures (000 to 359).

The particular of (a) the signal to be used to obtain the bearing, (b) the time used by the direction-finding station in question and (c) the time used by the mobile station, and (d) the time used by the direction-finding station in question shall be given in the list of stations.

The particular of (a) the signal to be used to obtain the bearing, (b) the time used by the direction-finding station in question and (c) the time used by the mobile station, and (d) the time used by the direction-finding station in question shall be given in the list of stations.
